RE: Clark Fork-Pend Oreille River Basin Adjudication (CFPRBA) Claim No. 97-4203

Dear Claimant,

The Idaho Department of Water Resources (department) has attempted to communicate with you on multiple occasions concerning the need to amend Claim No. 97-4203. The claim you submitted was for Domestic and Irrigation purposes. After further review of the claim, it was discovered a pond is used to store irrigation water. The department was working with you to prepare and amend the claim to add irrigation storage as a use. To help prepare the amendment, department staff needed the dimensions of the pond, to include the maximum depth. Department staff requested this information on multiple occasions with no response.

Without an amended claim, the department will have to move forward by recommending the claim based on the information provided on the original claim. If you intend to include the pond and the use of storage water from that pond, please submit an amended claim that includes the uses of Irrigation Storage, Irrigation from Storage, any other uses you intend to include for the pond, and a detailed map showing the area where irrigation takes place. A water loss calculation and detailed dimensions for the pond will also be required as an attachment to the amended claim.

Please submit the requested amended claim with the necessary information within 14 days. If the department does not receive the amended claim, the claim will be recommended based on the information provided in the original claim.

Please call me if you have any questions.

Sincerely,

Jared Adamson
Water Resource Agent, Sr.
