H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office exam because it is for irrigation of less than 5 acres. The exam was conducted on July 17, 2025, by Jared Klay. At the time of the exam, ownership of the permit is in the name of Aaron & Johanna Krieger. Current Idaho County taxlot data represents Aaron Krieger owns the land appurtenant to the place of use (POU) and point of diversion (POD). Proof of Beneficial Use was submitted on July 7, 2025.

The permit holder was authorized to develop up to one acre of irrigation. GIS data and photos provided by the permit holders verified the place of use as 1 acre. Therefore, I am recommending the place of use for irrigation as 1 acre, with a diversion rate of 0.03 cf. I am not recommending volume, as this use is exempt from volume reporting requirements as per the Beneficial Use Rules.

The source was described as an unnamed stream on the application for permit and was therefore permitted as such. However, on the statement of completion, the permit holder referred to the source as a spring. After correspondence with the permit holders, review of USGS topographic maps, and a review of other Water Right PODs in the general vicinity, it was determined that "unnamed stream" is an accurate description of the source and a licensing amendment to change the source to "spring" is not needed.

All the conditions of this permit have been met. The permit holders confirmed they have installed a fish screen and are in compliance with Condition X15. Condition 004 will be removed because there are no property concerns. All other conditions will be carried over to the license.
