H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office exam because it is for external domestic use, and the total diversion rate is less than 0.24 cfs. The exam was conducted on August 6, 2025, by Jared Klay. At the time of the exam, ownership of the permit is in the name of Dellago LLC. Current Bonner County taxlot data represents the permit holder owns the land appurtenant to the place of use (POU) and point of diversion (POD). Proof of Beneficial Use was submitted on July 30, 2025.

GIS data and photos provided by the permit holder were used to verify external domestic use on the permit holder's property. I am recommending a diversion rate of 0.04 cfs and an annual volume of 0.6 af, per Application Processing Memo #22.

All the conditions of this permit have been met. Condition 029 will be removed from the license because the permit holders confirmed that they have installed a fish screen on their intake. Condition 004 will be dropped because there are no property concerns. All other conditions will be carried over to the license.
