Hi Angie!

Thank you very much! I appreciate you letting me know as I am the person keeping track of that water right. Our weir is functioning beautifully allowing a small, but useful amount of water into the conservation area. I am doing well and I hope you are having a wonderful summer.

Thank you for the notice,

Michelle

Michelle,

Good morning! At the risk of being redundant in light of how much time as passed, I wanted to let you know you have been added as an interested party in the database record for water right 63-11923. It appears your contact information was added some time ago, but I'm unsure if I emailed you to let you know. I wanted to make sure you were informed this update was accomplished. I hope this email finds you well.

Regards,
Angie

Good Morning Angie,

One more small detail. I talked to Kris a few weeks back and was hoping to have my name added as an interested party just to make sure I receive any future communication. She was going to forward my request to have that updated.

It currently reads Emily Reaves, but should be me, Michelle Meyers 3010 E Parkriver Drive Boise, ID 83706.

Thanks, sorry, I hope this is not too much trouble to change.

I wish you a wonderful summer too!

Michelle

Hi Michelle!

Thank you for the kind note. I appreciate your kind words and I will share them with others involved. I know the processing timeline was a little longer than I'd personally hoped for, but I'm pleased you're satisfied with the outcome. I wish you and your group a wonderful summer!

Cheers!
Angie

Hi Angie,

On behalf of the Natures Wood Duck Island HOA I would like to thank you and others involved with the reinstatement and licensing of water right 63-11923. It has been a long and sometimes arduous path to get here, but we are happy and satisfied with the result and conditions of licensure.

Sincerely,

Michelle Meyers

Thanks Mike.

Angie, if you could print this email chain to the water right file, that will do it for me. Thanks and have a great weekend.

Mike,

What do you think? Are the conditions of the water right clear enough for you and future watermasters to this license deliver out-of-priority (with appropriate Stewart Decree cuts)?

Terry,

Good morning! Water right license no. 63-11923 condition no. 3 was placed on the license as IDWR's standard language to reference the mitigating water rights and by association the mitigating water rights priority allowing for diversion when the mitigating water rights are in priority so long as the water right holder maintains control of the mitigating water rights. If I'm understanding your request correctly, it sounds like you are asking IDWR to modify condition no. 3 to elaborate on what mitigation is/accomplishes. It is common for the Department to try to keep condition language brief and targeted while relying on memos and other documents in the water right file to elaborate on the details of water administration and other matters. With that said, I believe the standard condition language is adequate, but if Natures Wood Duck Island Homeowners Association Inc. wishes to petition for reconsideration to express why the standard condition language is inadequate, the Department is happy to consider the matter further. A petition for reconsideration from the water right holder is due within 14

days of the certificate of service date (April 25, 2023). It would be helpful if the petition for reconsideration included suggested language that the water right owner believes more adequately describes the mitigation than the Department's standard language. Please let me know if you have any questions.

Regards,
Angie

Angie,

I spoke with Michelle Meyers Wood Duck Island about the attached license. We are very happy to see this issued. Thank you.

The order reinstating the permit recognized that the water right can be diverted out of priority because consumption is mitigated by the two senior priority water rights. The snip below is from page 4 of that order.
<image002.png>

We are requesting that the Department add a condition to the license (or modify condition 3) to recognizes that the right can be diverted out of priority during the irrigation season I think we all understand this now, but it might eliminate confusion in the future.
