

## MEMORANDUM

**To:** Water Right File: 37-494, 37-495, 37-577BU, 37-577BV and 37-833K  
**From:** Ashley Ritter  
**Date:** May 10, 2023  
**Re:** Reporting Requirements Review

---

On December 28, 2022, the Idaho Department of Water Resources ("IDWR") received the 2022 Aquifer Recharge-The Valley Club Inc. report for the above-mentioned water rights. The report was submitted by Brockway Engineering ("Brockway") on behalf of the right holder, The Valley Club Inc. An annual report submittal reporting the daily volume of water recharged during the year is a requirement under transfer 78255 (water rights 37-494, 37-495, 34-577BU, 37-577BV condition 11, and 37-833K condition 14).

Brockway submitted data outlining daily volumes infiltrated for 2022 at the Valley Club Inc.'s recharge site.

Condition seven (for water rights 37-494, 37-495, 34-577BU, and 37-577BV) and condition ten (for water right 37-833K) within transfer 78255 states:

"Rights 37-494, 37-495, 37-577BU, 37-577BV, and 37-833K are limited to a combined diversion rate of 0.59 cfs and a combined diversion volume of 12.8 acre-feet for ground water recharge between March 15 and October 31 each year. No more than 5.1 acre-feet of ground water recharge shall occur prior to June 1 each year."

Reviewing the 2022 daily infiltration data submitted by Brockway, it is reported that 5.0 AF of water was infiltrated prior to June 1, 2022 (less than the limited 5.1 AF infiltration volume authorized prior to June 1<sup>st</sup> each year), 7.3 AF infiltrated during June 2022, and 1.2 AF infiltrated during July 2022. The total water infiltrated during the 2022 season is reported as 13.5 AF. This reported total is more than the limited combined diversion volume for ground water recharge of 12.8 AF for water rights 37-494, 37-495, 34-577BU, 37-577BV and 37-833K.

The reporting requirement included in the approved transfer 78255 for the above-mentioned water rights have been satisfied.
