RE: Murray Idaho Water Rights

Ms. Walling,

IDWR received your letter dated May 5, 2022 requesting information about the water rights held by Murray Water Association. It appears that the association currently holds a single water right (No. 94-8142) which authorizes 0.11 cubic feet per second (roughly 49.5 gallons per minute) and 24.6 acre-feet per year for municipal use. The water right authorizes the use of a single well, on the northern border of Murray. If your current water use falls within those parameters, then no additional authorization is required from the Idaho Department of Water Resources. However, diversion from another well or the use of more water *would* require additional authorization.

I have included a report summarizing the water right with this letter. Please let me know if you have any additional questions.

Thank you,

Cody Parker  
Water Rights Supervisor  
Idaho Dept. of Water Resources

Dear Sirs,

Murray, Idaho has a water association for our city water and the officers do not believe we need to register with the Idaho Dept of Water Resources because we own the water and mineral rights to the property our well is on. Can you please respond with the facts to this question so I may present it at our next water meeting on June 4<sup>th</sup>. Your time on this matter is greatly appreciated.

Sincerely,  
Christina Walling
