1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. WATER SUPPLY BANK LEASE CONTRACT No. 1968

7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a **Notice of Change in Water Right Ownership** during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The use of water for irrigation under this right may begin as early as March 1, provided other elements of the right are not exceeded. The use of water before March 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.
13. The unleased portions of right 63-32257 when combined shall not exceed a total diversion rate of 0.03 cfs, a total annual maximum diversion volume of 9.0 af at the field headgate, and the irrigation of 2.0 acres.

CAUTION: This email originated outside the State of Idaho network. Verify links and attachments BEFORE you click or open, even if you recognize and/or trust the sender. Contact your agency service desk with any concerns.

Probably, yes. The paperwork is a bit confusing. It is irrigation rights that we have had for years and banked several times.

It should be 38 acres since we are holding out 2 of the 40 acres for our use.

The second re-bank is the 9.27 acres we own at the west end of the 40 acre property. All of that is being banked.

Please call me to make sure we have the paperwork correct.

Good Morning,

I'm reviewing Lease Application 3119 for Jeanie Amen and noticed that the applicant intends to lease 63-32019 of the full water right into the bank, but only wishes to submit a portion of the water right, 63-32257. In the application, under the portion section, you indicated that it is for domestic use for 34 acres. Did you mean to specify irrigation for 34 acres instead?
