208	To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from _____ Well No. _ located in T____, R____, S____, ____.	Use Condition 226 for Transfers. Used for municipal rights to describe the original location of the well where the right was developed prior to being used as an alternative point of diversion for multiple water rights. This version is for a single well that has not been replaced, meaning that it is listed as a point of diversion on the water right. First used for City of Pocatello SRBA recommendations.	General	True	Adjudication	ACCOMPLISHED, MUNICIPAL,PD	
209	To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from _____ Well No. _ located in T____, R____, S____, ____ Well No. _ located in T____, R____, S____, ____ and _____ Well No. _ located in T____, R____, S____, ____.	Use Condition 226 for Transfers. Used for municipal rights to describe the original locations of the wells where the right was developed prior to being used as alternative points of diversion for multiple water rights. This version is for multiple wells that have not been replaced, meaning that they are listed as points of diversion on the water right. First used for City of Pocatello SRBA recommendations.	General	True	Adjudication	ACCOMPLISHED, MUNICIPAL,PD	
210	To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from _____ Well No. _ located in T____, R____, S____, ____ which was replaced by _____ Well No. _ located in T____, R____, S____, ____.	Use Condition 226 for Transfers. Used for municipal rights to describe the original location of the well where the right was developed, and the location of the well where the point of diversion was transferred to prior to being used as an alternative point of diversion for multiple water rights. This version is for a single well that has been replaced, meaning that the replacement well is listed as a point of diversion on the water right. First used for City of Pocatello SRBA recommendations.	General	True	Adjudication	ACCOMPLISHED, MUNICIPAL,PD	
211	To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right from _____ Well No. _ located in T____, R____, S____, ____ Well No. _ located in T____, R____, S____, ____ and _____ Well No. _ located in T____, R____, S____, ____ Well Nos. __ and _ were replaced by _____ Well No. _ located in T____, R____, S____, ____.	Use Condition 226 for Transfers. Used for municipal rights to describe the original location of the wells where the right was developed, and the location of the well or wells where the points of diversion was transferred to prior to being used as an alternative point of diversion (single replacement well) or alternative points of diversion (multiple replacement wells) for multiple water rights. This version is for multiple wells that have been replaced, meaning that the replacement well or wells are listed as a point or points of diversion on the water right.	General	True	Adjudication	ACCOMPLISHED, MUNICIPAL,PD	
226	To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, this right retains its original priority for well locations authorized under this right as identified in <decree, license or Transfer XXXXX> dated <XX-XX-20XX>.	Used for municipal rights to describe the administrative limits of the right to the original locations of the well(s) where the right was developed prior to being used as alternative point(s) of diversion for multiple water rights. Choose the last administrative action (before current action) representing each right along with the related date. This condition relies on department records & can replace conditions 208-211 that require specific descriptions be added for each right for accomplished transfers of municipal rights recommended in an adjudication. Added 06-2010.	Point of Diversion	True	Water Rights	TRANSFER, MUNICIPAL,PD	
190	In connection with the proof of beneficial use submitted for this permit, the permit holder shall also submit a report showing the total annual volume, the maximum daily volume, and the maximum instantaneous rate of flow diverted from the point of diversion authorized for this permit during the development period. The report shall also show the maximum instantaneous rate of diversion, either measured or reasonably estimated by a qualified professional engineer, geologist, or certified water rights examiner, for the entire City of Nampa municipal water system. The report shall also describe and explain how water diverted under this permit provides an additional increment of beneficial use of water for the City of <Nampa> municipal water system as opposed to an alternative point of diversion for prior water rights already held and used by the City of <Nampa> for its municipal water system.	Condition 190 was added as a standard on 7/6/2006, although it was used prior to that date on several municipal permits in the Treasure Valley. The purpose of the condition is to prevent municipalities and municipal providers from having more rights on paper than they have ever actually used, as was the case with United Water Idaho. Municipalities and municipal providers often file an application for a new water right whenever they need a new well, regardless of whether the well is for new production or whether it is to replace an old well. The report required by the condition is intended to show whether diversions from the new well is an additional increment of beneficial use or simply an alternative point of diversion for existing water rights. Could apply to surface water rights also.	Purpose of Use	True	Water Rights	PERMIT, WATER RIGHTS, MUNICIPAL	Permit Condition
