Cody,

I've gone through just about everything in the draft approvals and spreadsheet you sent. Below are my new comments, followed by a list of earlier issues I believe have all been resolved. I'm generally available to discuss next week, except for Friday.

New issues/comments:

1. Proposed Condition 10 (see, e.g., 63-10862) contains the following condition: "Point of diversion located within SESW, S05, T04N, R01E is known as Floating Feather Well. Point of diversion located within SWNW, S07, T04N, R01E is known as Redwood Creek Well #1. The right holder shall measure its diversions from the Floating Feather well and report water diverted and water levels measured to the Department upon request."
 - a. This proposed condition is nearly identical to a condition in water permit 63-12452, originally associated with the Redwood Creek and Floating Feather wells. Permits 63-11878 and 63-12192 contains similar conditions. Is permit 63-12452 the origin of the proposed condition?
 - b. This condition makes a reference the Redwood Creek Well #1, but does not require anything with respect to that well. This appears to be a vestige from the condition in permit 63-12452, which identified the names of the two wells/PODs. This language seems unnecessary in this case since (i) there is no reason to identify the Redwood Creek well in this condition because no action is required with respect to that well, and (ii) the Redwood Creek and Floating Feather POD locations are listed in the APOD list approved under IMAP. I suggest removing the first two sentences of the condition to make it less confusing.
2. Proposed Condition 11 (see, e.g., 63-10862) contains a condition concerning water bearing zones for certain wells.
 - a. A typo is in the third listed POD location—it says "SWNWW." The last W should be stricken.
 - b. Alternatively, the POD legal descriptions could be replaced with the well names for ease of reading since all the POD locations are listed in the APOD list approved under IMAP.

3. Four rights were decreed with 43 APODs (63-2500, 63-2874, 63-19456, and 63-7067), while many others were decreed with 42 APODs. The additional POD in the 43 APOD set is in T03N, R02E, Sec. 9, NENW, but has no name in the spreadsheet. I'm not sure what this well is called, or if it was constructed. Transfer 4998 notes that 2 PODs are authorized in this location, and the application for that transfer says they are "proposed new UWI 27th Street Well[s]." I'm not sure if they were ever constructed, and no well in that location is in the 81 APOD list for IMAP. I'm not sure how to handle this in the IMAP approval if the wells don't exist but the location was in the decree.

Old issues/comments:

1. Swift 1: location should be T04N (not T03N)—RESOLVED
2. Swift 2: location should be Sec. 30 (not Sec. 31)—RESOLVED
3. 63-4395: original well was Barber #1, now called Durham (not Licorice)—RESOLVED
4. 63-7641: PD listed 11 additional PODs (in addition to original) for a total of 12 PODs—RESOLVED
5. 63-10405: River Run was original well—RESOLVED
6. 63-9671: Maple Hills 1 was original well—RESOLVED
7. 63-9855: Frontier was original well—RESOLVED
8. 63-19456: location of original well (Thirteenth St)—RESOLVED
9. 63-10391: header in draft approval incorrectly says 63-9384—RESOLVED
10. 63-2989: original well location should be R01E (not R02E)—RESOLVED
11. 63-7204: original well should be just "Arctic" (not Artic 1 or 2)—RESOLVED
12. 63-7658: original well is Bali Hai--RESOLVED

Thanks,
Mike
