Water Right No. 63-34335

FOR DEPARTMENT USE ONLY

Preliminary check by LL Fee = \$100 Received by CC # W052792 Date 10-27-25

ACTION OF THE DEPARTMENT OF WATER RESOURCES

The Idaho Department of Water Resources hereby approves the above Application for Amendment for Permit No. 63-34335 with the following:

Conditions of Approval

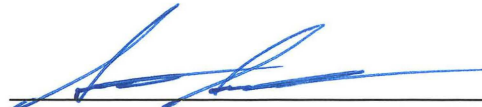

1. This right authorizes total annual storage volume of 1816.8 acre-feet, 32.5 acre-feet to be used for the initial filling or carryover storage of the flooded fields and 1784.3 acre-feet for the replacement of losses caused by seepage and evaporation.
2. The field flooding established by the storage of water under this right shall not exceed a total capacity of 32.5 acre-feet or a total surface area of 65 acres.
3. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
4. The source of this right is wastewater. The wasting of water may be discontinued at any time. This right remains subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place or manner of wasting, or to recapture.
5. The Wildlife, Recreation, Wildlife Storage, Recreation Storage, and Diversion to Storage uses of this right shall be junior and subordinate to water right no. 63-33467 and 63-34318, and water right no. 63-33467 and 63-34318 shall be junior and subordinate to this right's irrigation use of 1.3 cfs.
6. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
7. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
8. The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein. Enforcement of those portions of the agreement not specifically addressed in other conditions shall be the responsibility of the protestant and the water right holder.
9. Wildlife and recreation uses are for flow through to prevent freezing of the associated wildlife storage and recreation storage on 65 acres of field flooding for waterfowl habitat and hunting.
10. To the extent surface return flows result from the diversion of water under this right, the holder shall cause such flows to be returned to the Dixie Slough, and shall not allow any such return flows to be diverted into the Meadows Drain.
11. The wildlife and recreation components of this right shall be junior and subordinate to future water rights authorizing the diversion and use of water from the Dixie Slough and its tributaries, including ground water, for consumptive uses, except that this right shall not be subordinate to future water rights for similar wildlife, recreation and/or aesthetic uses.

State of Idaho

Application for Amendment
(For Licensing Purposes)
Water Right No. 63-34335

12. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.

This amendment is issued pursuant to the provisions of Idaho Code § 42-211.

Signed this 27th day of October, 2025.

Storms, Scott
Water Rights Supervisor

RE: Water Right Permit No. 63-34335

Dear Permit Holder(s):

The Department of Water Resources is reviewing the permit(s) referenced above prior to issuing water right license(s). By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit.

The examiner who verified your water use reported that certain elements of the permit(s) have been developed differently than described on your permit(s). Changes that do not increase the authorized use of water under the permit(s) can be requested and approved in accordance with Idaho Code § 42-211. Before license(s) can be issued, your permit(s) must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit(s):

☒ Point(s) of Diversion

☐ Place(s) of Use

☐ Other

The enclosed Application for Amendment form(s) depicts the elements of the water right(s) as they will appear on the license(s) when issued. Please review the amendment form(s) carefully. If you concur with the information presented, please sign and return the form(s) with the filing fee of \$100.00 within fourteen (14) days.

If you have any questions, please call me at 208-605-4624.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Scott Storms', with a long horizontal flourish extending to the right.

Scott Storms
Water Resources Supervisor
