ATTN: Water Right No. 65-23254

Dear Water Right Owner,

During a recent review of water rights it was recognized that the volume associated with the stockwater use on right 65-23254 had also incorrectly been recorded as a total volume. Given there is no volume associated with the irrigation use on this right, there should be no overall total volume recorded on the right.

Furthermore, the right contains a combined limit with water right 65-24253 for the rate and volume associated with the stockwater use, as well as a combined limit for the entire diversion rate between the two rights. Right 65-23254 has since been split, creating "child" right 65-24233 and this child right contains all the stockwater use originally associated with 65-23253.

To correct these issues, the total volume was removed in the records on water right 65-23254. Additionally, the combined limit for stockwater use was updated to reflect rights 65-23253 and 65-24233, and the combined limit for total diversion was updated to reflect all three rights. A copy of a water right report displaying the right before and after the changes, with changes highlighted, is attached for your records. If you have any questions regarding this matter, please feel free to call the Western Regional Office at 208-334-2190.

Sincerely,

Scott Storms
Water Resources Supervisor
IDWR Western Regional Office

Proof Report

- Adjudication court at a point in time no later than the entry of the final unified decree.
4. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 65.
 5. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
 6. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
 7. X35 Rights 65-23253 and 65-23254 when combined shall not exceed a total diversion rate of 0.01 cfs and a total annual maximum diversion volume of 0.5 af for stockwater purposes.
 8. Rights 65-23253 and 65-23254 when combined shall not exceed a total diversion rate of 0.55 cfs for all uses.

UPDATING CONDITIONS TO REFLEC AND INCLUDE WR 65-24233 SPLIT FROM 65-23253
