Hi Pamela,

Water right nos. 97-7158 & 97-7490 share a point of diversion. When water right no. 97-7490 was licensed in 2016, it included the condition limiting the combined diversion rate of both rights to 0.07 CFS (see Condition of Approval #5). As such, that limitation must be carried forward in our water right recommendation of those claims. For reference, I have attached a copy of Water Right License No. 97-7490.

Please let me know if any additional questions arise, and I will be happy to help.

Thanks,

~ Evan

Hey thanks for this Evan,

I do have another question with regards to water rights – 97-7490 & 97-7158

97-7490 – Original issuance shows max diversion rate of .07 CFS &
97-7158 – Original Issuance shows max diversion rate of .06 CFS - However the documents we were sent now say these two are a combined diversion rate of .07 CFS

Can you let me know what changed?

Thanks,

Pamela Huck
