2. Measurements: No rate on water right therefore no rate measurement is necessary.

E. FLOW CALCULATIONS

 N/A Additional Computation Sheets Attached

Measured Method: No measurement taken because there is no diversion to storage on this right.

F. VOLUME CALCULATIONS

1. Volume Calculations for irrigation: N/A
2. Volume Calculations for Other Uses: Stock Water Storage

Pond Analysis:

Pond Compacity =0.4 AF

Total Volume =0.4 AF

License Recommendation = 0.4AF

G. NARRATIVE/REMARKS/COMMENTS

A field exam was conducted on June 27, 2025, by Senior Water Right Agent Marcelina Williams and was accompanied by Cherie Moore who is a co-agent of Eckhardt Family LLLP. The permit was approved on August 30, 2019, and proof of beneficial use was submitted on September 16, 2024.

The point of diversion (POD) location was confirmed as an unnamed stream in the NWNW of Sec 36, T13N, R06W, and is accurately described by the permit. No overlapping PODs were found. No amendment is required to correct the legal descriptions.

Water runs south from the unnamed stream and water is damned up by a check structure that is less than 10 ft high creating the POD. The unnamed stream is winter runoff water that dries up around June each year. The water is held in ~ 0.4 AF pond that feeds back into the channel via a ditch to the east of the dam crest. This design is to ensure that once the fill volume of the pond is reached there is a way to allow water to continue downstream.

The permit authorizes 0.09 AF for stockwater storage use within the NWNW of Sec 36, T13N, R06W. ArcMap tools and aerial imagery, supported by photos taken during the field exam, were used to verify the area. The pond has a surface area of ~0.1 acres and a total capacity of 0.4 AF. The recommended volume for licensing is 0.4 AF. This water is used for stockwater storage for ~200 calf-cow pairs. No amendment required to correct the legal description of the POU.

Condition 103 replaced 121 per department standards. Conditions X02, 076 and 26A were removed at licensing per department standards. ~~R06 and a~~ written in condition were carried over at licensing.

Have conditions of permit approval been met? ☒ Yes ☐ No
