5. Describe the diversion and delivery system from the water source to the use (pump, lift, irrigation method, etc.).

I will be pulling water from Priest Lake through a screened 1 inch foot valve connected to approximately 75 ft of 1 inch black poly pipe. The pipe will be connected to a Goulds Jplus 1 hp pump feeding a Amtrol Well-X-Trol well tank approximately 20 gallons. From there it will pass through a 25 micron filter and then through a 5 micron filter then through a ultraviolet light into the home.
