Subject: Bear River Basin Water Right Claims
Attachments: 11-7076 Water Right Claim.pdf; 11-7056 Water Right Claim.pdf; Map.pdf

Dear Claimant,

While reviewing your water right claims 11-7056 and 11-7076 based on irrigation licenses, there is some information that we need to continue reviewing them.

- 1) We noticed a discrepancy with the map you provided and the claimed irrigated acres. Claim 11-7056 has a map showing ~52 acres but claiming 166 irrigated acres on the document and claim 11-7076 has a map showing ~166 acres but claiming 52 acres on the document. It is possible that there was a mix up with the agent that helped you in the office, but I will need to confirm that before continuing to review your water right claims. Please let me know if the map attached to this email is accurate, if they are switched between their respective claims, or provide a new map showing both claims 11-7056 and 11-7076 irrigated places of use.
- 2) Please state the year that the property first started to be irrigated in the way referenced in your provided map.

You are welcome to give me a call at the number below if you need help with this or to schedule an in-person meeting.

Thanks,

Justin Edgel
