If the water right proposed for lease is located within a permissible place of use (PPU) and portions of the PPU will continue to receive water from non-leased water rights, clearly outline on a map the acres within the PPU that will continue to be irrigated, as well as acres that will be idled during the lease term. Label the map **Attachment 3**.

MEMORANDUM FOR APPLICATION # 3295

To: Water Right No's. 37-22970, 37-22971, 37-22972, and 37-22973

From: Skyler Cheever – Water Resource Agent, Sr – State Office

Date: 11/5/2025

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 3295 was sent in by the Northridge V. Subdivision Owners Association and received by the Department on September 16th, 2025, with the correct fee payment received the same date. The applicant proposes leasing the entirety of Water Right No's. (WR) 37-22970, 37-22971, 37-22972, and 37-22973 into the Water Supply Bank (WSB) from 2026-2030. This application is part of a lease rental package with rental application 3280 under the same applicant. The proposed point of diversion (POD) is within the Snake River Basin and Big Wood River, Big Wood River Groundwater Management Area, and Trust Water Area. This application is intended as a renewal of lease contract 1416 which is set to expire on December 31st, 2025.

AUTHORITY TO FILE:

Marcia Hills signed the application. Ms. Hills has the authority to sign the application because she is a secretary with the association according to the Idaho Secretary of States Office Database. The proposed POD is from the Hiawatha Canal. A canal consent letter was attached with the application. The proposed WR's owned by the Northridge V. Subdivision Owners Association according to Department records.

WATER RIGHT VALIDITY:

WR's 37-22970, 37-22971, 37-22972, and 37-22973 were decreed by the SRBA court in 2011. The WR's have been leased into the WSB from 2016-December 31st, 2025. According to Idaho Code §42-1764 if a WR is leased into the WSB the forfeiture clock resets once the lease expires. Therefore, there is enough information available to the bank to conclude WR 63-34099 is likely not lost to forfeiture and can be leased into the WSB.

ENLARGEMENT OF USE:

There are no other irrigation WR's overlapping the proposed POD and place of use (POU). The proposed WR's are limited when combined to the irrigation of 11.5 acres. If the WR's were leased and rented separately there would be more volume of water and acres irrigated than would be historically causing an enlargement. Therefore, these rights should be leased and made rentable together. The proposed POD diverts from the Hiawatha Canal. A canal consent letter was included with the lease applications and requested a 20% holdback for seepage losses from the canal. Therefore, to prevent an enlargement the rentable diversion rate for each right and when combined should be reduced by 20%.

LOCAL PUBLIC INTEREST:

Accepting valid rights into the water supply bank to provide water for new and supplemental uses is in the local public interest.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The proposed POD is within Administrative Basin 37 and Water District 37. A request for comment was sent to the Watermaster and Southern Regional Manager on November 6th, 2025. No concerns were received.
