RE: Summer Report for Licensed Water Rights 35-14240, 35-14241, 35-14242, 35-14243 and 35-14655 in the Name of Farmland Reserve, Inc.

Dear James:

This document is being prepared to satisfy the stipulated agreement dated December 1, 2014, signed agreement between Surface Water Coalition (“SWC”), Idaho Power Company, IGWA, and the permit developer (Lance Funk) pertaining to the approval of water right permits 35-14240, 35-14241, 35-14242 and 35-14243. The property and associated water right licenses have been purchased by Farmland Reserve Inc. (“FRI”). The company representatives are Jared Cobell and me.

The water rights contain the following condition:

As resources allow, the Department will conduct at least one in-person field examination of the authorized place of use of this right each year to verify the required mitigation and authorized irrigation under this right prior to June 15th of each year. It shall be the responsibility of the right holder to follow up with the Department by June 15th of each year to determine if the field examination was performed. If the Department is unable to conduct the field examination for any reason, the right holder or its consultant shall perform the field examination and report findings from the field examination to the Department and the protestants to this right by July 15th of each year.

This letter is the July 15th report referenced in the condition.

Because of the unavailability of the mitigation source for the subject water rights, these rights will not be diverted in 2025. The acres covered by these rights will either not be irrigated and will remain dry or will be covered with other ground water rights or water supply bank

approvals. Attached are maps that summarize the water sources for the areas covered by the subject water rights.

We appreciate your attention to this matter. If you have any questions or need any further information, please let me know.

Best regards,

Robert L. Harris
