Form 113

Ident No. 13-7756

RECEIVED

AUG 18 2010

Department of Water Resources
Eastern Region

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

NOTICE OF DIVERSION AS AN ALTERNATIVE TO
INSTREAM STOCKWATER USE

Oneida Narrows (Bear River)-Rocky Point Pump, Pipeline and trough.

(To provide notice of intent to divert surface water from a stream or
riparian area to troughs
or tanks as an alternative to instream use for the watering of livestock)

1.

Name of right holder: Bureau of Land Management Pocatello Field Office
Phone (208) 478-6340

Mailing address: 4350 Cliffs Drive, Pocatello, Idaho 83204 Email
id_pocatello-fo@blm.gov

2.

Source of water supply: Bear River

3.

Point of Diversion:

a)

Is this notice based on an existing recorded instream stockwater right?
If yes, provide the water right number: June 28, 1934.

If no, describe the beginning and ending points for the instream
stockwater use:

Beginning point is in Gov't. Lot , SE 1/4 SE 1/4 SE 1/4,

Section 9, Township 14S Range 40E, B.M.,

Franklin County.

Ending point is in Gov't. , SE 1/4 SE 1/4 SE 1/4,

Section 9, Township 14S Range 40E, B.M.,

b)

Alternate point of diversion is in Gov't. Lot , 1/4 1/4
 1/4,

Section , Township Range , B.M.,
 County.

4.

Description of diversion and delivery system:

a) Describe the type of diversion Pump-pipeline-troughs. Water from
the Bear River would be pumped via pipeline into three troughs. The
troughs are located in an area that is fenced off from the river. (See
design enclosures). This is being done to keep cattle from watering in

AMENDED

the river as they have done historically. Bank shear and bank trampling, would be eliminated; as a result, sedimentation and water quality at the area of use will improve due to the removal of cattle watering in the river.

b) Describe the delivery system.

A portable pump would pump water via pipeline to three 750 gallon troughs. (See design enclosures).

c)

Describe the number, type and total capacity of troughs or tanks.

Three steel 750 gallon troughs

Form 113

d)

Describe the automatic shutoff or flow control mechanism or means of returning unused water to the source __ Troughs would be manually filled by the pump until full, then the pump would be manually turned off and removed until the next filling is needed.

e)

Describe how the system is designed to allow measurement of the rate of diversion- The three 750 gallon troughs would be filled manually as needed.

5.

Describe the place of use by placing an X in the appropriate 40-acre tract(s) below:

TWP-14S RGE-40E SEC-9 NE NW SW SEXX
NE NW SW SEXX NE NW SW SEXX NW SW SE NE NW SW

6.

Priority date claimed or established June 28, 1934.

7.

Rate of diversion 2,760 gal/day

8.

Season of use: from May 1 to September 15

9.

a) Who owns the property at the point of diversion? BLM USA

b) Who owns the property at the place of use? BLM USA

10.

When will construction occur? Summer 2010

11.

Comments (include number and type of stock) 115 Cattle

12.

12.

Map of project required - Attach an 8½"x11" map clearly identifying the location of the instream stockwater use and the locations of the alternative point(s) of diversion and stock trough(s). A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

Form 113

I hereby assert the following:

a) Diversion is from a surface water source to which the livestock would otherwise have access. The land where the watering tanks or troughs will be located is land from which the livestock had access to the source of water from which diversion is being made.

b) The diversion of water out of the stream as described in this notice is for watering livestock and will not injure other water rights.

c) I will not alter the bed and banks of the source as the term is defined in section 42-3802, Idaho Code. I understand that I may place an inlet conduit into the source in a manner that does not require excavation or obstruction of the stream channel, unless the director of the department of water resources approves a stream channel alteration permit for additional work.

d) I understand that upon determination of interference with other water rights, the Director may order curtailment of diversion or use of water under this notice or may require the diversion and delivery system to be modified to prevent injury.

e) I will not divert more than 13,000 gallons per day for livestock watering from this diversion, and I will not use more than one point of diversion under this notice.

f) I am authorized to make the changes described in this notice and that if the notice involves a federal grazing allotment, the permittee consents to the changes described in this notice.

g) I understand that any willful misrepresentation on this notice will void any right to divert water for livestock under this notice.

Dated this 13 day of August, 2010
