RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
10. This rental when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
61-12226	IRRIGATION	0.2	27.2	6.8		0.2	27.2	6.8
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.2 CFS	27.2 AF	6.8 AC

*Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

NOT APPLICABLE

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☐

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

THIS WATER RIGHT HAS BEEN PREVIOUSLY RENTED BY ME SUMMER IN 2016 AND 2017. IT WAS MODIFIED IN 2018 TO THE 6.8 ACRES NOTED. ALSO I RENTED IT 2019-2023, THE REASON RENTAL IS NOTED IS THAT WATER RIGHTS # 61-25-26 AND 61-10033A (THAT ARE FOR MY PROPERTY HAVE BEEN BLOCKED BY NEIGHBOR TED HEFFMAN)

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2770 was sent in by Pam M. Warthen and received on September 28th, 2023. The applicant proposes to lease 6.8 acres of contract 1778 for water right 61-12226 from 2024-2028. The proposed rental place of use includes two overlapping rights, 61-10033A and 61-252C. However according to section 3D on the application surface water is blocked at the water rights authorized point of diversion. The proposal will move the POD where diversion is available. The point of diversion is within the Snake River Basin Moratorium Area, Mountain Home Groundwater Management Area, and Trust Water Area. This application is intended as a renewal of agreement 285 which is set to expire on December 31st, 2023.

AUTHORITY TO FILE:

Pam M. Warthen signed the application. Ms. Warthen has the authority to file this agreement because she is the current owner of the place of use in which rental water will be applied according to Department records.

INJURY TO OTHER WATER RIGHTS:

The rental point of diversion is 4 miles downstream of the nearest POD authorized under water right 61-12226. There is only one irrigation right that diverts directly from Canyon Creek, the remaining rights are mostly stockwater. Therefore, the short distance between the lease and rental point of diversion would likely not reduce the quantity of water enough to injure other water users. The proposed point of diversion is not within the Eastern Snake Plain Aquifer Ground Water Management Area Modeling Boundary. Therefore, modeling is not required.

The proposed rental point of diversion is not authorized under water rights that overlap the place of use. This is because the points of diversion for water rights 61-10033A and 61-252C does not have access to water under the current point of diversion. The applicant received permission from Terry Seegrist and Ireland Ranch to divert from the proposed point of diversion. The point of diversion is located at the redirection point from Canyon Creek to Feeder Canal. Therefore, injury is unlikely. Ireland Ranch is the current owner of the proposed point of diversion according to Department records.

ENLARGEMENT OF USE:

Two water rights overlap the proposed place of use, 61-10033A and 61-252C. Combined they are limited to the irrigation of 6.5 acres. To prevent enlargement of water rights 61-10033A and 61-252C this rental when combined with the overlapping rights should be limited to the irrigation of 6.8 acres. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within basin 61 and Water District 61A. The Water Master and Western Regional Manager were contacted for comment on November 27th, 2023. No response was received, it is assumed there is no concern with the applicant's proposal.

Hi Skyler,

It sounds like this is a repeat of a previous rental, but I'll make two minor, largely inconsequential comments now:

1. The point of diversion from the creek should be the Feeder Canal (NWNENW, Sec. 36, Township 02S, Range 06E) that is owned and operated by the Mountain Home Irrigation District. It appears that the proposed POD (based on the GIS shape) is a point of rediversion from the Feeder Canal in the SENW, but I recognize the Ireland Ranch rights describe their point of diversion at the location off of the Feeder Canal as well, so I suppose it is reasonable to do the same since Warthen will be using the same delivery system as Ireland, from what I understand.
2. The rental memo incorrectly states the Department records show Pam Warthen as the owner of the existing rights that describe Warthen's land. Our records describe Tindall and Hoffman as owners of those rights, and we have documentation in the backfile that the ownership is disputed between Hoffman and Warthen and the Department has advised both parties to resolve the ownership issue in district court before IDWR will update its records.

Other than clarifying in the memo that the Department records do not show Warthen as the water right owner, I don't have other comments.

Nick.

RE: Water Bank Rental

To Whom It May Concern

Enclosed is my application to rent water for a 5-year period (2024-2028) from the Water Bank. I have been able to rent Water Right No. 61-12226 for the past 8 years total. It is my hope that my application will be approved and that I may continue to access water for my property through the Water Bank.

If there is any additional information needed, please do not hesitate to contact me.
