RE: *December 1st Report for Licensed Water Rights 35-14240, 35-14241, 35-14242, 35-14243 and 35-14655 in the Name of Farmland Reserve, Inc.*

Dear James:

This document is being prepared to satisfy the stipulated agreement dated December 1, 2014, signed agreement between Surface Water Coalition ("SWC"), Idaho Power Company, IGWA, and the water right permit developer (Lance Funk) pertaining to the approval of water right nos. 35-14240, 35-14241, 35-14242 and 35-14243 (collectively the "water rights"). The property and associated water rights (which are now licensed) have been purchased by Farmland Reserve Inc. ("FRI"). The company representatives are Jared Cobell and me.

The water rights contain the following condition:

By December 1st of each year, the right holder shall provide a written report to the Department describing the number and location of acres irrigated that year, the volume of water diverted under this right, the source of mitigation for the next irrigation season, and the number and location of acres proposed to be irrigated in the following year.

Because of the unavailability of the mitigation water source for the water rights, the water rights were not exercised in 2025 such that no water was diverted under these water rights in 2025. The acres covered by these rights were either not irrigated and remained dry or were covered with other ground water rights or water supply bank approvals.

This report is consistent with the July 15th report previously submitted where we explained that no water would be diverted in 2025 under the water rights.

We appreciate your attention to this matter. If you have any questions or need any further information, please let me know.

Best regards,

Robert L. Harris
