10. Place of use is Lot 2, Greenhorn Bench Subdivision.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes No

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
37-22826	Irrigation	0.17	N/A	3		0.03	1.8	0.5
37-2644C	Irrigation	0.07	12.3	3.5		0.01	1.8	0.5
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.04	1.8	0.5
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes No

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 37-2644C AND 37-22826, AGREEMENT 797**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$41.40 per year** was calculated based on the current rental rate of \$23.00 per acre-foot times a diversion volume of 1.8 acre-feet. Since you are both the lessor and the renter of the rights, **you are only obligated to pay the 10% administrative fee or \$4.14.** An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check in the amount of \$4.14 for 2024 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

If you have any questions, please contact this office at (208) 287-4800.

MEMORANDUM FOR WSB RENTAL AGREEMENT # 797

To: Water Right No(s). 37-2644C, 37-22826
From: Skyler Cheever-Water Resource Agent
Date: 11/8/2023
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2737 was sent in by Raymond Thomas Goodrich and received on August 31st, 2023. The applicant proposes to lease a portion of lease contract 1767 for water rights 37-2644C and 37-22826 from 2024-2028. There is an exempt domestic use overlapping the place of use allowing for the irrigation of 0.5 an acre but the applicant would like to irrigate more, 1 acre total. The point of diversion is within the Snake River Basin and Big Wood River Moratorium Area, Big Wood River Ground Water Management Area, Galena Groundwater District, and Trust Water Area. Galena Groundwater District were informed of this application on November 20th, 2023. This application is likely intended to renew agreement 346 which is set to expire on December 31st, 2023.

AUTHORITY TO FILE:

Raymond Goodrich signed the application. Mr. Goodrich has the authority to file this agreement because he is the current owner of the place of use and has access to the points of diversion according to Department records. This is because he is an owner of water rights 37-2644C and 37-22826 according to Department records.

INJURY TO OTHER WATER RIGHTS:

The points of diversion will remain the same as under water rights 37-2644C and 37-22826. The PODs are not within the ESPA GWMA Modeling Boundary and would not require modeling. It is unlikely there would be any injury to other water right users under this proposal.

ENLARGEMENT OF USE:

Water rights 37-2644C, 37-22826, 37-153C, 37-2644D, 37-2644E, 37-2822, and 22827 are limited to the irrigation of 13.5 acres of irrigation combined. A condition should be added to limit this rental, the unrented portions of 37-2644C and 37-22826 along with the other 7 rights to the irrigation of 13.5 acres. The applicant will have access to both surface water (37-22826) and groundwater (37-2644C) and therefore should be limited to 0.02 cfs/acre and 3.5 af/acre when combined with all other rights to prevent enlargement.

According to an email conversation between WSB staff it might be possible 37-2644C is supplemental to 37-22826. This could create enlargement concerns if the place of use does not have access to available surface water. However, 37-2644C isn't conditioned as supplemental and can be presumed to be primary. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The points of diversion are within basin 37 and Water District 37. The Watermaster and Southern Regional Manager were contacted for comment on November 20th, 2023. No response was received, it is assumed there is no concern with the applicant's proposal.
