4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 02.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2764 was sent in by Darrel Agenbroad and received on September 22nd, 2023. The applicant proposes to rent 27 acres from lease contract 1622 for water rights 2-7036, 2-7037, 2-7038, and 2-7127. The previous agreement was based on a Notice of Violation. The point of diversion is within the Snake River Basin Moratorium, Bruneau-Grandview Groundwater Management Area, and Trust Water Area. This application is intended as a renewal of agreement 782.

AUTHORITY TO FILE:

Darrel Agenbroad signed the application. Mr. Agenbroad has the authority to file this agreement because he is the current owner of water rights 2-7168A and 2-10436 according to Department records. These water rights overlap with the proposed place of use and share the same proposed point of diversion as this rental proposal.

INJURY TO OTHER WATER RIGHTS:

Both the proposed point of diversion and point of diversion under lease contract 1622 both divert from the CJ Strike Reservoir on the Snake River and are only 1.27 miles apart. Therefore, it is unlikely there would be any injury to other water rights. The proposed point of diversion is the rediversion point from the Snake River into the Bybee Canal System. The canal company provided documentation with the application indicating they could accommodate the additional water proposed in the application. The point of diversion is not within the ESPA Modeling Boundary and would not require modeling. There are no other injury concerns.

ENLARGEMENT OF USE:

Water rights 2-7036, 2-7037, 2-7038, and 2-7127 combined are limited to 23.6 cfs. These water rights are also limited with water rights 2-7025, 2-7350, 2-2129, 2-2130, 2-2406, 2-7020, 2-7021, 2-7033, and 2-7034 to 62.56 cfs. However, the combined limit of the proposed water rights and the remaining rights is additive with the total combined limit. Therefore, the four proposed water rights can be rented without renting the remaining nine rights and cause enlargement.

The duty of water of the proposed portions of water rights 2-7036, 2-7037, 2-7038, and 2-7127 combined is 0.017 cfs and 4.97 af/acre. Water rights 2-7168A and 2-10436 overlap the proposed place of use and are limited to 0.02 cfs per acre and 4.5 af per acre. Therefore, more acres, 31.8, should be rented to increase the authorized diversion rate per acre to 0.02 cfs. To prevent enlargement of water rights at the rental place of use the authorized volume should be reduced to meet the volume per acre of 4.5 af/acre. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

Hello Rob and Nick,

Best,

Skyler
