4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes No

Yes No

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

43-2413	Irrigation	1.8	360	90		1.8	360	90
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	3.76	820.0	205.0
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes No

Yes No

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

Dear Renter:

Please find enclosed a receipt in the amount of **\$19,425.76** and a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of a total of 1,088.4 acre-feet of water during years 2023. Upon receipt of these fully executed agreements, you are authorized to divert water in compliance with the conditions of water use described in the agreement. There was an error in the total requested for payment, which should have been \$19,414.76. The overage of \$11.00 will be applied to Rental Agreement 743 for year 2024. Please see the breakdown in payments, below.

For rental agreement 730, a rental fee of **\$18,791.00** per year was calculated based on the current rental rate of \$23.00 per acre-foot times a diversion volume of 817 acre-feet. Pursuant to the Water Supply Bank Rules, 90% or \$16,911.90 of the rental fee will be paid to the lessor(s) and 10% or \$1,879.10 will be retained by the Department to offset administrative costs for **2023**.

For rental agreement 737, A rental fee of **\$103.96** was calculated based on the current rental rate of \$23.00 per acre-foot times a diversion volume of 45.2 acre-feet. Since you are both lessor and renter, you are only obligated to pay the 10% administrative fee or \$103.96 for **2023**.

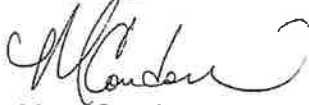

For rental agreement 738, A rental fee of **\$108.56** was calculated based on the current rental rate of \$23.00 per acre-foot times a diversion volume of 47.2 acre-feet. Since you are both lessor and renter, you are only obligated to pay the 10% administrative fee or \$108.56 for **2023**.

For rental agreement 743, A rental fee of **\$411.24** was calculated based on the current rental rate of \$23.00 per acre-foot times a diversion volume of 178.8 acre-feet. Since you are both lessor and renter, you are only obligated to pay the 10% administrative fee or \$411.24 for **2023**. **The overage paid of \$11.00 will be applied to 2024 administrative fee for this agreement.**

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2592 was sent in by East Valley Cattle and received on February 15th, 2023. The application is part of a lease/rental package with lease applications 2593 and 2594. This application proposes to rent contracts 1688 and 1690 from the water supply bank from 2023-2025. The point of diversion is within the Raft River CGWMA, Snake River Moratorium, Raft River Groundwater District, and Trust Water Area. The Groundwater District was notified of this rental on February 16th, 2023. This application is a renewal of agreement 459.

AUTHORITY TO FILE:

William Millenkamp signed the application. Mr. Millenkamp has the authority to file this application because he is a manager with the company according to the Idaho Secretary of States Office Database. East Valley Cattle is the current owners of the place of use in which rental water will be applied according to Department records.

INJURY TO OTHER WATER RIGHTS:

ESPA Modeling is not required. The proposed points of diversion are not moving outside any GWMA's or CGWMA's the lease points of diversion were part of. There are no other injury concerns.

ENLARGEMENT OF USE:

Many water rights appurtenant to the property are limited to a 110.15 cfs total diversion rate, 25,268.5 af total diversion volume and the irrigation of 7101.6 acres. However, factoring the curtailment of expansion rights due to a 2016 order within the Raft River CGWMA the rights are limited to 6,327.9 acres within the PPU. To prevent enlargement this rental and other water rights within the PPU will be limited to a 113.7 cfs total diversion rate, 6,532.8 af total diversion volume and the irrigation of 6,532.8 acres.

The proposed portions of water rights 43-2347 and 43-23413 authorize 0.017 cfs/acre and 4 af/acre for the irrigation of 205 acres. Water rights within the rental PPU are limited to 0.015 cfs/acre and 3.5 af/acre. To prevent enlargement of water rights within the PPU, use under this rental will be reduced to match the rate and volume per acre.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within Basin 43 and Water District 143. The Water Master and Southern Regional Manager were contacted for comment on February 16th, 2023. No response was received, it is assumed there is no concern with this proposal.
