RECITALS

1. The Board is authorized under chapter 17, title 42, Idaho Code to operate a water supply bank and to contract with lessors to act as an intermediary in facilitating the rental of water.
2. The Lessor has filed a completed application to lease water rights described below into the Water Supply Bank on forms supplied by the Idaho Department of Water Resources and received by the Department on May 01, 2023.
3. The Director of the Idaho Department of Water Resources has reviewed the application for compliance with the Water Supply Bank rules and has approved the Lease subject to conditions listed below.

NOW, THEREFORE, in consideration of the mutual covenants and contracts herein contained, and other good and valuable consideration, the receipt of which is hereby acknowledged, the parties hereto agree as follows:

1. **WATER RIGHTS:** The Lessor shall lease and the Board shall accept into the Bank the Applicant's water rights described as follows:

Summary of Water Rights or Portions Leased to the Bank

Water Right No.	Priority Date	Source	Diversion Rate (CFS)	Diversion Volume (AF)	Acres (AC)

Combined Lease Totals			0.46	80.9	23

2. **COMPENSATION:** The Lessor shall accept and the Board shall pay compensation determined by the amount of water rented under the following rental rate during such times as the water is rented from the Bank over the term of this Lease.

Minimum Payment Acceptable: Current Rental Rate

3. **TERM OF LEASE:** The term of this lease shall be January 1, 2023 to December 31, 2027. This Lease shall bind the parties and take effect when both parties have signed it.

5. **CHANGE OF WATER RIGHT:** This lease specifies water right elements including but not limited to: diversion rates; diversion volumes; number of acres authorized to be irrigated; places of use; points of diversion; beneficial uses; and seasons of use. During the term of this lease, if a water right is administratively changed due to a water right split and renumbering, this lease may be reduced by an equal amount to reflect the water right elements as legally defined under the water right. If a lease contract cannot be reduced sufficient to reflect the legal definition of a water right as amended through a water right split and/or water right transfer, the Board may release the water right from the Water Supply Bank.
6. **ASSIGNMENT OF CONTRACT:** This lease is between the Board and the Lessor, who is the recognized owner or designated representative of the recognized owners of water rights described herein. Should ownership of any part of a water right herein described change during the term of this lease, either through a water right split, a water right transfer, sale of property to which the water right is appurtenant, or through any other recognized water right reassignment, the lease benefits and obligations to the conditions of acceptance for any such water rights will be assigned to the new owners.
7. **DUPLICATE ORIGINAL:** This Lease is executed in duplicate. Each of the documents with an original signature of each party shall be an original.

C: REPRESENTATIVE

MEMORANDUM FOR APPLICATION #2665 & 2666

To: Water Right 22-14115 & 22-14143
From: Bob Howe
Date: 09/05/2023
Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

The complete 2023 application for leases 2665 & 2666 and fees were received by the Water Supply Bank (WSB) on May 1st, 2023. The applicant purposes to lease the entire water right (WR) 22-14115 (idling 23.1 acres of irrigation) and the entire WR 22-14143 (idling 15.6 acres of irrigation) into the WSB for a 5-year term. WR 22-14115 is also the right number for the parent right of 22-14115, 22-14142, and 22-14143.

AUTHORITY TO FILE:

The application for lease was submitted and signed by Kim Trotter, Executive director, Teton Regional Land Trust (TRLT). The application was submitted with documentation signed by Arantza Zabala (Board President TRLT), authorizing Kim Trotter as a signatory for TRLT. A business search on the Idaho Secretary of State (IDSOS) website found that Arantza Zabala is listed as the President on the 2023 TRLT annual report. Teton County parcel data lists Teton Regional Land Trust Inc. as the current owner of parcel RP05N46E300100, appurtenant to the right 22-14115 place of use (POU). There are no concerns regarding the applicant's authority to file the application for lease.

WATER RIGHT VALIDITY:

Aerial imagery indicates little evidence of irrigation occurring within the POU for the leased right. In section 4.F. of the application for lease, the applicant stated that the full rates for both rights have been diverted, when legally available, for irrigation of the property. The decree for parent right 22-14115 is for a portion awarded to Idaho and deducted from the settlement of Roxana Canal Co. v Daniels, Equity No. 2447. The point of diversion for this water right is in Wyoming, T44N, R118W, S20 SESE, Sixth Principal Meridian. The point of diversion listed on the decree is where the conveyance system enters Idaho.

On September 13, 2023, I called Kim Trotter and left a voicemail, which was followed up with an email, requesting additional information regarding when water has been legally available to divert for irrigation under WRs 22-14115 & 22-14143 over the last 5 years.

The applicant responded via email on September 26th, 2023, stating beneficial use occurred as recently as 2018 and reiterated that the right is junior to most rights sourcing the Waddell Ditch. The applicant stated that as the ditch is diverted in Wyoming, and not administered by a water district, they are unable to provide any documentation regarding the availability or past curtailment periods. Historic satellite imagery exhibits reasonable evidence of irrigation and cultivation at the place of use within the last 5 years. There are no concerns with validity of the water right offered to the bank. However, I informed the applicant that further information from them and a review will be necessary before any rental can occur.

ENLARGEMENT OF USE:

Water right 22-14115 has sibling rights 22-14142 & 22-14143. The POUs for each right are separate (no combined limits or POU overlaps). The shared POD is upstream of the upper reach of Minimum Stream Flow (MSF) right 22-7369 for the Teton River. The POD is within the SRBA moratorium area but is not administered by water district #1. Water would only be available for rental at times water is available for legal diversion from Teton Creek for right 22-14115. No rights overlap WR 22-14115. There are no concerns regarding enlargement due to the lease of full WR 22-14115 into the WSB.

LOCAL PUBLIC INTEREST:

Review staff have no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The POD for WRs 22-14115 & 22-14143 is located in Wyoming and is not subject to administration by Water District #1. The POD for the rights is upstream of the upper reach of MSF right 22-7369 for the Teton River. The purported lease contract, map and application were attached to a comment request emailed on October 20, 2023, to Eastern Regional Manager, James Cefalo.

Dear Interested Agencies:

The Department of Water Resources is seeking comment from your agency, regarding the Water Supply Bank (WSB) Lease Contracts 1736 & 1737, for Teton Regional Land Trust. The applicant purposes to lease the entire water right (WR) 22-14115 (idling 23.1 acres of irrigation) and the entire WR 22-14143 (idling 15.6 acres of irrigation) into the WSB for a 5-year term. A copy of the proposed lease contracts, the lease reviews, and maps are attached for your reference.

Please submit your comments within 14 days, no later than November 03, 2023. If we do not hear from you by that date, we will assume that no comment from you means you have no objection to, concerns about, or conditions pertaining to the execution of the lease.
