7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.
13. Water rights 37-22119, 37-23015 and this lease when combined shall not exceed 13,000 gallons per day for stockwater use.
14. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.
15. A portion of this right provides conveyance for other right holders in the shared delivery of water through the Hiawatha canal. To prevent injury to other water right holders, the watermaster shall deliver 0.06 cfs of the leased portion of this right into the Hiawatha Canal whether it is rented or not.

MEMORANDUM FOR WSB LEASE APPLICATION # 2664

To: Water Right No(s). 37-23015

From: Skyler Cheever, Water Resource Agent

Date: 2/23/2024

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2664 was sent in by the Peter Carse and Amy Carse Revocable Living Trust and received on May 3rd, 2023, with the correct fee payment received on the same date. The applicant proposes to lease the entirety of water right 37-23015 into the water supply bank from 2024-2028. The place of use will continue to receive water via a domestic well. The point of diversion is within the Snake River Basin and Big Wood River Moratorium Area, Big Wood River Groundwater Management Area, Galena Groundwater District, and Trust Water Area. This application is intended as a renewal of contract 1002 which expired on December 31st, 2023.

AUTHORITY TO FILE:

Peter Carse signed the application. Mr. Carse has the authority to file this agreement because he is a trustee of the Peter Carse and Amy Carse Revocable Trust according to Tax Parcel Data. Water right 37-23015 is currently owned by the Peter Carse and Amy Carse Revocable Trust according to Department records.

WATER RIGHT VALIDITY:

Water right 37-23015 was decreed in 2010. In the previous lease application, the applicant indicated 0.10 cfs was diverted in 2014 by hand sprinkler lines. Google Earth Imagery indicates the place of use was irrigated since it was decreed-2019. The right was leased into the bank from 2019-December 31st, 2023. Any water right or portion thereof leased into or rented from the water supply bank is likely within a valid defense to forfeiture according to Idaho Code §42-223(5). Therefore, enough evidence is available to the bank to conclude water right 37-23015 is likely not lost to forfeiture and can be leased into the bank.

INJURY TO OTHER WATER RIGHTS:

Water right 37-23015 authorizes diversion from the Hiawatha Canal. An authorization letter was received from the canal company dated April 11th, 2023. In the previous lease application, the canal company recommended a 20% conveyance holdback to accommodate evaporation and seepage losses from the canal. However, the current letter conveyance losses were recalculated. The increase was justified because losses from a lateral off the main canal were considered. I am recommending the rentable diversion rate be reduced to accommodate conveyance losses.

ENLARGEMENT OF USE:

There are no other irrigation water rights overlapping the place of use. The stockwater portion is limited when combined with water rights 37-22119 and 37-23014 to 13,000 gal/day. A condition should be added to the contract limiting the lease when combined with water rights 37-22119 and 37-23014 to 13,000 gal/day, preventing possible enlargement. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within basin 37 and Water District 37. The Watermaster and Southern Regional Manager were contacted for comment on February 23rd, 2023. No response was received, it is assumed there are no concerns with the applicant's proposal.
