8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.

 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The unleased portion of water right 29-4112 shall not exceed a total diversion rate of 0.50 cfs and the irrigation of 34.5 acres.
13. The unleased portion of water right 29-7183 shall not exceed a total diversion rate of 0.75 cfs, a total annual maximum diversion volume of 273 af at the field headgate, and the irrigation of 78.0 acres.

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2567 was submitted by Marilyn Mikkelson and received on January 20th, 2023, with the correct fee payment received the same date. The applicant initially proposed to lease the entirety of water right 29-4112 into the water supply bank from 2023-2027. After an initial review on February 24th, 2023, it was discovered there was an overlapping stacked water right, 29-7183. The applicant was contacted and applied for water right 29-7183, received on June 12th, 2023, with the correct fee payment received the same date. The new application proposed to lease a 99-acre portion of 29-7183 and a 47.7-acre portion of 29-4112 into the water supply bank from 2023-2027. The applicant also indicated a 100-acre pivot requiring a higher diversion rate, 1.56 cfs or 0.02 cfs per acre.

2023 imagery indicated the 100-acre pivot was irrigated. After a meeting on March 25, 2024, it was decided to lease a proportionate amount of both rights into the bank for 2023-2027 while leaving a proportionate amount remaining for the 100-acre pivot. The applicant was then notified via email on April 2nd, 2024, to submit a rental application from 2023-2027 proposing to rent back the remaining rate, reaching the desired rate/acre used on the pivot. The points of diversion are within the Snake River Basin Moratorium Area and Non-Trust Water Area. This is the first time these water rights have been leased into the water supply bank.

AUTHORITY TO FILE:

Marilyn Mikkelson signed the applications. Ms. Mikkelson has the authority to file this agreement because she is the current owner of both water rights according to Department records.

WATER RIGHT VALIDITY:

Water rights 29-4112 and 29-7183 were decreed in 2003. Any water right appurtenant to land placed in a federal cropland set aside program are like within a valid defense to forfeiture during the contracted period according to Idaho code §42-223(1). Therefore, the water rights would be protected from forfeiture from 2003-2017.

Nonuse would likely not have been exempt from being lost to forfeiture from 2018-2022. This year, 2023, would be the 6th year of nonuse. According to Administrative Multiple Programs Memo #2 if a water right holder resumes use or meets an exemption to forfeiture, during the 6th year of nonuse they are protected from being lost to forfeiture. Therefore, enough evidence is available to the bank to conclude water rights 29-4112 and 29-7183 are likely not lost to forfeiture and can be leased into the bank.

ENLARGEMENT OF USE:

Water rights 29-4112, and 29-7183 places of use partially overlap and are likely considered stacked according to the definition set in Administrative Water Rights Transfer Memo #24. If the water rights were leased and made rentable separately there would be an increase in the rate and volume beyond historic use leading to enlargement. Therefore, these rights should be leased together to prevent enlargement. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within Basin 29 and Water District 29H. The Watermaster and Eastern regional manager were contacted for comment on April 9, 2024. No response was received, it is assumed there is no concern with the proposal.
