1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.
5. While a water right is in the bank, forfeiture provisions are stayed pursuant to Idaho Code § 42-223(5).
6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK LEASE CONTRACT No. 1856

7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Leased surface rights 34-282C and 34-452E were historically delivered through private ditch just upstream from the Lower Burnett diversion structure.
13. Use of water under leased rights 34-282C, 34-452E, 34-2438, and 34-10795 will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 34.
14. Upon specific notification of the Department, the right holder shall install and maintain data loggers to record water usage information at the authorized point(s) of diversion in accordance with Department specifications.
15. Leased rights 34-2438 and 34-10795 when combined shall not exceed a total diversion rate of 0.51 cfs and a total annual maximum diversion volume of 105.0 af at the field headgate.
16. Leased rights 34-2438 and 34-10795 when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
17. Leased right 34-10795 is for an enlargement of Right No. 34-2438 pursuant to Section 42-1426, Idaho Code.
18. Leased right 34-10795 is subordinate to all water rights with a priority date earlier than April 12, 1994, that are not decreed as enlargements pursuant to Section 42-1426, Idaho Code. As between water rights decreed as enlargements pursuant to Section 42-1426, Idaho Code, the earlier priority right is the superior right.
19. Leased rights 34-282C, 34-452E, 34-2438, and 34-10795 when combined shall not exceed a total diversion rate of 0.75 cfs and the irrigation of 30 acres.
20. During the term of this lease, the unleased portions of rights 34-282C and 34-2438 when combined shall not exceed a total diversion rate of 0.075 cfs and the irrigation of 3 acres.
21. The diversion and use of water for irrigation under right 34-2438 is limited to 3 acres within the authorized place of use described under water rights 34-2438.

WATER SUPPLY BANK LEASE CONTRACT No. 1856

Hi Mary,

We only have the one well and it is the source for both the yard and the pasture. There are no other water sources used.

Warmly,

Hi Mary,

The signed version of Attachment 1A is attached.

Your maps included unirrigated areas such as dry corrals, an alleyway, and green areas outside of the fenced and irrigated areas.. There is also a space between the pasture and the yard that is not irrigated and should not be included in the irrigated acres. I have attached maps drawn along the fence lines that enclose the irrigated areas. Using the measuring tool on the Custer County map server, the pasture is 3.0 acres, and the yard is 0.53 acres.

Please realize that last year we received an outrageous amount of precipitation and many un-irrigated acres were lush and green all summer long. Many of these areas lie immediately next to the pasture and yard, but are not included in the pasture or yard. Since they are not irrigated, they should not be included in irrigated acres.

The 0.1 acres to the NW is not a field. It is an earthen ice skating rink, and is not irrigated.

There is another patch of bare dirt in the map I attached. It is not a field, but rather the site where our barn was being built last summer.

Hopefully this is everything you need. Send me an email if you have any questions.

Thank you,

Jessica

Good afternoon,

I am reviewing your lease application and I do not see the Attachment 1A submitted for the Designated Applicant. I have attached a blank Designated Applicant – Attachment 1A form. Please fill the form out and return it with both owner's signatures.

Additionally, you did not identify any other sources for irrigation occurring on the property in the lease application per question 4E, however, in your email reply in December for irrigated acres you stated the lawn and garden should not be deducted from your water right acres. A domestic exemption only covers ½ an acre of outside irrigation and would be considered a different source. Please see the attached map of calculated acres around the home, the pasture, and an unknown field to the NW and reply with what source (ground water or surface water) you are using to irrigate the property and from which well if it is irrigated with ground water. Specifically, are you irrigating the pasture from the irrigation well for the water rights or from the domestic well? Are you receiving or using any surface water, including wastewater from the SE? Are you using the domestic well or irrigation well to irrigate the lawn and garden? Also, please let me know if the 0.1 acre field to the NW is farmed or irrigated.

Due to the changes to the property and increase in irrigation since the last lease review more than five years ago, these questions must be fully answered to properly review the lease proposal. Once I have received the above additional information, I can continue processing the lease review.

Thank you,

Mary

Hi Mackenzie,

In the map you put together, you've included the yard and garden space in the irrigated area. The lawn and garden area don't count for the water right acreage. Our pasture wraps around two sides of the lawn so the green areas blend together from above. Please use the second map that was submitted with the application.

30.0 acres should be leased to the water bank. We use 3.0 acres to irrigate 3.0 acres of pasture.

Thank you,
Jessica

Good morning, Jessica,

We received your applications to lease water rights 34-282C, 34-452E, 34-2438, and 34-10795 to the Water Supply Bank. The applications look complete, I just want to verify the number of acres requested to be leased to the Bank. In the map below, the green (irrigated) area is about four acres. The water rights allow for 33.0 acres of irrigation. Would you prefer that the number of acres offered to the Bank be decreased to 29.0 acres to allow for these four acres to be irrigated? Or is this imagery no longer accurate and 30.0 acres should be leased to the Bank as shown on the second map below that was submitted with the application?

Please let me know which map will best reflect your irrigation in 2024-2028 and whether any adjustments should be made.

Thank you,
