Blake,

We've discussed with Phillips the concern regarding diversion rate and have identified a few options.

Option A is to change the pump size and rotate pivots to stay within the remaining water right.

Option B is to sell the whole water right. I think this might be their preferred.

Option C is to lease it, either through the Water Bank or to the Ground Water District or GWD users for mitigation or allocations.

We'll keep sorting through the options with them to identify which one we will be doing. It may end up being a combination of options.
