Hi Justin,

Sounds good. I have removed water right #37-833F from the application.

Best,

You can exclude said water right.
Thanks,
Justin

Hello Mr. Stevenson,

We are working on the initial review for your Water Supply Bank Lease Application #2392. One of the water rights included to be leased is 37-833F. This water right does not have an overlapping Place of Use, meaning that it is not stacked like the rest of the rights are. Water right #37-833F would need to be filed as a separate lease application if you would still like to lease the right. If you would like us to create a separate lease for this right (requiring an additional \$250 application fee) we can do so, or we can exclude the water right from lease application #2392. Please let me know how you would like to proceed or if there is additional information that would change the situation.

Thank you and have a great day,
