Yes, that sounds correct to me as well.

Dylan

Salubria is fine with Dylan's proposal.

To be clear, Dylan's language would replace Condition 8 in 67-14643 and Condition 9 in 67-14645 (which are the same), and Condition 6 in 67-14643 and Condition 7 in 67-14645 (which are the same) would be deleted. language is used.

Thanks,

Mike

**EXTERNAL**

Phil and Mike,

How about this. It seems to me like the two conditions that relate to measurement above the pond can be collapsed into one that reads something like this:

"Prior to diversion of water under this right, and to determine the amount of water entering the reservoir, the right holder shall install and maintain structures at a point within the SENW of Section 26, Township 15N, Range 3W, B.M., for measuring and controlling the amount of water delivered to the irrigation place of use, the storage place of use, and to downstream right holders."

Your thoughts appreciated.

Thanks,

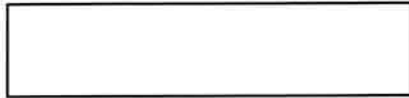

Dylan

Phill,

Salubria has reviewed the revised draft transfer approval. It looks good, except for the retention of Condition 6 in 67-14643 and Condition 7 in 67-14645 which read: "Prior to diversion of water under this

right, the right holder shall provide a means acceptable to the department to measure the amount of water entering the reservoir and the amount of water released from the reservoir.”

This condition seemingly requires Salubria, prior to diversion of water, to install measurement devices above and below the pond in addition to the devices agreed to by the parties. The parties agreed to measure the amount of water to the pond at the splitter, and out of the reservoir by downstream weir. These devices are sufficient to accomplish control over fill of and releases from the pond, making additional devices unnecessary. We believe this condition should be (a) removed so Salubria is not required to install additional devices, or (b) clarified to state that measurement at the splitter and downstream weir satisfy the conditions requirements.

Thanks,

Mike
