DEPARTMENT OF WATER RESOURCES

WATER SUPPLY BANK LEASE CONTRACT No. 2078

2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.

6. Rental of water under this right is subject to the limitations and conditions of approval of the water right.
7. Failure of the right holder to comply with the conditions of acceptance is cause for the Director to rescind acceptance of the lease.
8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.
13. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion and redirection. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.
14. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
15. Use of this right is combined with water from Base Line Canal Co.
16. Rights 37-20570, 37-20577 and 37-20593 when combined shall not exceed a total annual maximum diversion volume of 1386.0 af at the field headgate.

Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

The application to lease a portion of surface water rights 37-20570, 37-20571, 37-20574, 37-20577, 37-20578, 37-20581, 37-20584 & 37-20593 was received on May 16, 2022, and is part of the South Valley Ground Water District's ('SVGWD') participation in the Big Wood River Ground Water Management Plan ('BWRGWMA'), as approved by the Director of IDWR in 2022. The groundwater management plan originally proposed to lease certain surface water rights to the Bank and then rent the water rights as recharge. Any stacked ground water rights fallowed as part of the surface water rights leased are protected from forfeiture pursuant to Subsection 42-223(4), Idaho Code. There were delays in the implementation and execution of the fallowing portion of the GWMA plan, and the lease applications submitted to the bank in 2022 and 2023 can only now be processed with consideration of the years the acres were fallowed. The acres in this particular lease were fallowed from 2022-2024; the lease will be processed for 2022-2024 only to avoid enlargement.

AUTHORITY TO FILE:

The application was signed by Kristy Molyneux who is one of the water right owners and the designated lessor. Kristy Molyneux also owns the POU of the water rights. The POD is through the Baseline Canal Co. which gave consent to fully lease all water rights that are part of SVGWD's groundwater management plan on May 31, 2022. No concerns with authority to file for the 2022-2024 irrigation seasons.

WATER RIGHT VALIDITY:

Water rights 37-20570, 37-20571, 37-20574, 37-20577, 37-20578, 37-20581, 37-20584 were decreed in 2011 and 37-20593 was decreed in 2010. This is the first time the water rights will be leased to the Water Supply Bank. For the 2022-2024 irrigation seasons, sentinel imagery shows that the lessor has complied with fallowing only 57.6 acres of the 91.4 acres offered for lease. The statement of fallowing indicated that acres would only be fallowed from 2022 to 2024. Kristy Molyneux continues to fallow acres for the 2025 irrigation season under the groundwater management plan. No concerns with validity of the water right and the 57.6-acre portion offered to the bank for 2022 through 2024.

INJURY TO OTHER WATER RIGHTS: Lease of these water rights would not cause injury to other water rights due to unleased groundwater water right acres being fallowed during the 2022-2024 irrigation seasons. Since the 2024 irrigation season has concluded, the leased water right will not be rented out.

ENLARGEMENT OF USE:

Offered water rights share the legal POU with stacked groundwater rights 37-2658, 37-4421B, 37-7651, 37-11430 and surface water rights 37-22026, 37-22028, 37-22030, 37-22032, 37-22034, 37-22036, 37-22038 and 37-22040 for a combined limit of 591 acres and total combined diversion rate of 27.59 cfs. All water rights were idled on 57.6 acres for the 2022-2024 irrigation seasons. No concerns of enlargement.

LOCAL PUBLIC INTEREST:

This lease application is part of a ground water management plan with participation and exposure to the local public in support of the approved plan, including the partial lease of this water right. Review staff has no information to suggest this application is inconsistent with the local public interest.
