

Proposed Canal Company Service Area Place Change of Use

To whom it may concern:

The Lds church is buying 5 acres of ground labeled on attached maps. They are purchasing the property from Price Land LLC who owns ample amounts of both Harrison Water and Rudy Water shares. As you can see on the maps of Harrison and Rudy canal service area the proposed 5 acres sits on the bank of the Rudy canal. We propose that the 5 acres be adjusted to Rudy Service area because of the proximity of the property to the Rudy canal. They would like to put a pump in the Rudy canal as opposed to a Harrison field ditch for obvious purposes. I have met with both boards of directors of the Harrison and Rudy canal companies and have approval from both boards. Price Land owns and will transfer plenty of Rudy water as to not injure the Rudy Canal or any of its patrons or increase their rate of flow diverted. There would be no enlargement or injury occurring with this change. The Lds church would apply for a pump permit and maintain an irrigation easement for all parties involved. It also will not enlarge the water right within the place of use but rather just simply be transferred from Price Land to the Lds church upon the purchase of the 5 acres.

Thank you for your consideration and let me know if you have any further questions.
