Subject: RE: Meter installation

Hello Cari,

Your request for a little additional time has been granted. Please send pictures of the measurement devices to ensure they are properly installed. Once I see the pictures, I will be able to tell if I need to come to the site to get a better look at them. Thank you for keeping us informed of your progress.

Respectfully,

Daniel Nelson

Subject: Re: Meter installation

Good day Dan. We have the flow meters here but have some electrical parts and a water pump that have been back ordered. I would like to request an extension until May 17th in order for the parts to arrive and an electrician to install everything. Hopefully that's possible.

Thanks Cari Severance

Dear Ms. Severance,

I agree that it would be difficult to accomplish this with the snow we have had this year. I have spoken with my supervisor, and we have agreed to give you until May 1, 2019 to supply the information. I do want to caution you that additional requests may become harder to approve, since the measurement devices are supposed to be in place before you divert water this year. I look forward to hearing from you before the May 1, 2019 deadline.

Thank you Dan I will do that. With all the snow we have I doubt we'll be installing meters until mid or late April, when we put the pumps back in the water. I'm hoping for an earlier installation but Mother Nature seems to have other ideas this year. I will let you know as soon as we are able too.

Thanks Cari Severance

Dear Mr. and Ms. Severance;

I wanted to contact you to inform you that Mary Condon has taken a position outside the Idaho Department of Water Resources, and will no longer be involved in the licensing review of permit 63-23168. I will be taking over the licensing review of this permit. I accompanied Ms. Condon during the initial field examination and the measurement of the pond pump, so I am the very familiar with the system and the permit. Please forward all correspondence concerning the permit to me, and will do my best to resolve the issues with this permit as quickly as possible. The confirmation that the measuring device required in the conditions of the permit as discussed in the email below should also be sent to me by the April 1, 2019 deadline.

If you have any questions, please don't hesitate to contact me concerning this issue. I look forward to continuing to work with you to resolve this permit.

Respectfully,

Daniel Nelson

Good morning, Carri and Lynn,

Your request for an extension of time request to install a measuring device has been granted until April 1, 2019. The department will need proof of installation by April 1, 2019, or the permit will be voided.

Best,
Mary Condon
