Mary Condon:

We were finally able to meet with the Water Master, Ron Shurtleff, on Tuesday, October 9th. With his help we think we have a plan on how to meter the water. However, getting the products we need isn't as easy as I had imagined. I have to work with a salesman on line, I can't look 1st hand at meters and prices and complete descriptions aren't posted. I am waiting for a salesman to contact me, apparently they are in no rush. So it looks like there is no way we can meet the October 19th deadline.

We will be shutting down for the winter and having to remove the meters when we blow everything out probably within the next 30 to 45 days. What I would propose to you is, I would like to purchase the meters this year, but install them next spring when we start up again. We have discussed this with Ron Shurtleff and he also thinks this is the best course of action. I never dreamed that I wouldn't be able to get these meters from any of my usual water part distributors. I will provide proof of purchase as soon as I can. I hope this meets with your approval.

Thank You

Cari Severance
