Attachments: water resources.docx

Cari,

Mr. Shurtliff does not have the authority to grant an extension on the Notice of Intent Void Notice that was sent to you. However, we will assume your letter is requesting an additional 30 days to supply the proof that measurement devices have been installed on all three of your points of diversion. We will give you until October 19, 2018 to supply photos showing the measurement devices installed on each of your diversions.

If we do not receive the verification of measurement devices by that date, we will move forward with voiding the permit.

Thank you,
Mary

To Whom It May Concern:

We have spoken to Ron Shurtleff and he has given us a 30 day extension on having flow meters. He is sending us a list of acceptable meters and we are trying to locate them for sale. We are in the process of complying with the law. But I have had a hard time locating big enough meters. The water master is working with us on the meters. Thank you for your patience.
