John Terry Field signed the application. Mr. Field has the authority to sign the application because a designated lessor form was provided with the application in which the other owners of the WR according to Department records signed. The proposed POD is the starting point of the Bybee Canal. Written consent from the canal company the application. They did not indicate any holdback conveyance would be required.

WATER RIGHT VALIDITY:

WR's 2-7061, 2-7062, and 2-7157C were decreed by the SRBA court in 2009. The WR's have been leased into the WSB since 2004-December 31st, 2025. According to Idaho Code §42-1764 if a WR is leased into the WSB the forfeiture clock resets once the lease expires. Therefore, there is enough information available to the bank to conclude WR's 2-7061, 2-7062, and 2-7157C are likely not lost to forfeiture and can be leased into the WSB.

ENLARGEMENT OF USE:

The proposed WR's and multiple others divert from the proposed POD which is the starting point for the Bybee Canal. All of the WR's are limited when combined to 48.44 cfs. To prevent an enlargement this combined limit condition should be added to the contract and to any proposed rental agreement. The proposed WR's places of use (POU) do not overlap and are not limited when combined. Therefore, these rights can be leased and rented separately without causing an enlargement. The applicant proposes to lease a 161.4-acre portion of WR 2-7061. To prevent an enlargement of the unleased portion a condition will be added to the lease contract limiting the unleased portion to 3.09 cfs, 773.0 af at the field headgate, and the irrigation of 154.6 acres. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Accepting valid rights into the water supply bank to provide water for new and supplemental uses is in the local public interest.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:
