

MEMORANDUM

TO: Water Right File 65-13037B

FROM: Mary Condon

DATE: May 16, 2018

SUBJECT: Error on license and shape file of Water Right 65-13037B

Narrative/Purpose:

During a review for licensing of 65-23168, it was found that there was an overlap with water right 65-13037B on a pond.

The pond is listed as a source, point of diversion (POD) and place of use (POU) for the Tuckers (original land owners), limited to 0.5 af for stockwater storage. Upon review of the paper file, which includes both 65-13037A and 65-13037B together as 65-13037, it was further discovered the license does not list the POU for the stockwater storage. According to the field exam in 1995, the POU should be the same as the POD in NESE of Section 27, of Township 09N, Range 04E, as examined and applied for.

Additionally, ArcMap shows the POU shape incorrectly within the NWSE lot 2 and SWSE lot 2 of Section 27. The POU should be in the NESE of Section 27, of Township 09N, Range 04E.

Database and ArcMap shape of pond for water right 65-13037B has been corrected.
