

MEMORANDUM

Date: March 3, 2026
To: Transfer # 90235
From: McKenna Webster
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to change the place of use and point of diversion for a portion of water right 22-7144. This new portion is water right 22-14745.

Authority to File:

The water right's current owner entered into a sale agreement with Rocky Mountain Water Exchange LLC, and the applicants provided the purchase agreement between Rocky Mountain Water Exchange LLC and themselves. Upon approval of this transfer, the water right will be conveyed to the applicants. Additionally, Teton county parcel data shows that the applicants are the owners of the proposed place of use.

Water Right Validity:

The water right was decreed in the SRBA in 2009. Aerial imagery and google earth suggest irrigation of the place of use for over a decade. Forfeiture is not an issue.

Injury to Other Water Rights:

The transfer application was advertised, and no protests were received. No watermaster comment was given; at the time of request, there was no watermaster for Water District 122. No injury identified.

Enlargement of Use:

Associated rights were brought into the transfer in order to adjust the rate limits and prevent enlargement. The proposed changes will not result in enlargement because the authorized diversion rate, volume, and acreage will not increase as a result of the transfer.

Local Public Interest:

No issues identified.

Beneficial Use / Conservation of Water Resources:

No issues identified.

Effect on Economy of the Local Area:

No issues identified.

Effect on Agricultural Base of the Local Area:

No issues identified.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
