MEMORANDUM

TO: Transfer No. 90059
FROM: Marcelina Riddle
DATE: March 12, 2026
RE: Evaluation of Application

Darling Ingredients Inc. submitted transfer 90059 with the purpose of adding a point of diversion recently added to their system under permit 63-35339 to current water rights 63-7980 and 63-12333. The transfer also proposes updating the place of use to more accurately describe the industrial and irrigation place of use.

Summary of Information Submitted

Authority to File:
Transfer 90059 was submitted in the name of Darling Ingredients Inc., and IDWR records show the applicant as the current owner of water rights 63-7980 and 63-12333. The transfer was signed by Jon Elrod who has singing authority on behalf of Darling Ingredients Inc. as the VP of Environmental Affairs. The annual report put out by the State of Idaho Office of Secretary State shows Jon Elrod to be the current vice president as of 2025. Authority to file is presumed valid.

Water Right Validity:
Water right 63-7980 was decreed on 02/16/2007 and water right 63-12333 was licensed 08/07/2019 . The rights are presumed to be valid because they have been put to beneficial use within the last five years. Beneficial use confirmed by department aerial imagery and google earth images. Evidence of beneficial use does not need to be added to the file since it is an IDWR product available to other staff. Water rights are presumed valid, and no other evidence is presented to assume otherwise.

Injury to Other Water Rights:
Transfer 90059 proposes a change in place of use and adding a point of diversion. No increase in the quantity of water diverted should occur and therefore no injury is anticipated.

Enlargement of Use:
The proposed changes will not result in an increase in the diversion rate or land being irrigated. Enlargement does not appear to be an issue.

Local Public Interest:
This transfer is not anticipated to cause potential water quality issues, impact current land use requirements on non-private land or impact fish/wildlife resources. When the application was advertised no public comment was received. For these reasons this application proposes a change consistent with the local public interest.

Beneficial Use/Conservation of Water Resources:
The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Discussion

On water rights 63-7980 and 63-12333 conditions X27, T07, and T08 were added. On water right 63-7890 conditions X35 and 103 were added along with T07 & T08 that call out the transfer number, and C18 was updated to T19. Condition F02 explaining two points of diversion in the NESE was removed as the description was added to the face of the right.

Assuming other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.
