Currently, the extended filing deadline granted to PacifiCorp for Groups 1 and 2 is December 31, 2024 and Groups 3 and 4 is February 7, 2025. **PacifiCorp is requesting a second extension to July 1, 2025**, to file its notices of claims for Groups 1 through 4.

PacifiCorp operates the "Bear River System". The "Bear River System" is composed of the "Bear Lake Facilities" and the "Downriver Facilities." The Bear Lake Facilities are the existing facilities used by PacifiCorp today to divert water from the Bear River and to store and release water from the Bear Lake Reservoir (Bear Lake and Mud Lake). The Bear Lake Facilities include Stewart Dam, Rainbow Canal, Rainbow Canal Headgate, Ream-Crockett Canal Intake,

Ream-Crockett Canal, Bear Lake Causeway Inlet, Outlet Canal, Outlet Canal Headgates, Lifton Pump Station and Bear Lake Reservoir itself. The Downriver Facilities are PacifiCorp's hydroelectric and other facilities located on the Bear River below the Outlet Canal discharge.

The Bear River is an interstate river with a number of tributaries in the states of Utah, Wyoming and Idaho. Construction of the Bear River System was authorized by the Secretary of the Interior in 1907. Construction of the Bear River dams began in 1909 and was completed in 1927. Utah Power & Light, PacifiCorp's predecessor in interest, acquired water rights from various holders during these years in exchange for perpetual contracts to deliver certain amounts of irrigation water released from Bear Lake Reservoir. Management and delivery of PacifiCorp's water rights in the Bear River System are governed by court decrees, the Bear River Compact (as revised), contracts and other agreements.

PacifiCorp has and continues to make diligent efforts to investigate its claims. PacifiCorp has assigned several employees to work on the BRBA and has engaged consultants such as Rocky Mountain Environmental Associates and outside legal counsel to assist with investigation and confirmation of claims. Based on research to date, PacifiCorp believes it has over 50 claims to investigate in preparation for filing notices of claims in the BRBA. Given the number of claims, the interstate nature and complexity of the Bear River System, the 100+ year history of the Bear River System, the applicable court decrees in the Bear River Basin, and the numerous compacts and agreements involved, PacifiCorp is seeking more time to complete its investigation of all claim Groups 1 through 4 in the BRBA.

In addition to the continued efforts PacifiCorp has undertaken to investigate its claims in Basin 11 and Basin 13, PacifiCorp is coordinating similar efforts related to its water rights in Utah, which requires additional investigation to ensure BRBA claims are compatible with its Utah water rights and facilities.

PacifiCorp does not wish to inconvenience the Department and understands the Department's strong preference to receive and investigate claims well before issuance of a Director's Report. Based upon information provided in BRBA court filings, we understand the Director's Report for Basins 11 and 13 is anticipated to be published some time in 2026. A deadline of July 1, 2025, will provide at least one year for the Department to complete its investigation of PacifiCorp's claims. If this deadline is not acceptable to the Department, please let us know and PacifiCorp will work with the Department to set mutually agreeable deadlines for filing its notices of claims.
