Thanks for the follow up email. I think we are good with the draft.

Thanks,

Rob Harris

Rob,

Thanks for getting back to me. It is our standard practice to include combined limits in a transfer, even when the rights are from separate sources. Two of the eight rights associated with the place of use already have the 724-ac combined limit condition. See 74-157 from Springs and 74-15787 from Big Eightmile Creek. I added the condition for consistency.

Michael

Michael:

Thanks for sending this over. There is a new combined acreage condition for water rights that are not the subject of this transfer from Big Eightmile Creek:

4. Rights 74-349, 74-338B, 74-1105, 74-15787, 74-15788, 74-157, 74-369 and 74-1136 when combined shall not exceed the irrigation of 724 acres.

Is it standard for IDWR to do this? My preference is to not include this combined limit where 74-338B et al. are from a separate source and are not WRs included in the transfer.

Thanks,

Robert L. Harris

Rob,

Attached is a draft transfer approval. Thought I would run this one by you to see if you had any questions. Please get back to me by Wednesday of next week if you want to discuss.

Thanks.
