RE: Water Right No. 29-07699 – Request for Measurement Data

February 6, 2024

Dear Maher Wissa,

The Idaho Department of Water Resources (IDWR) is conducting a hydrogeologic characterization project in the Upper Portneuf Basin and is collecting relevant hydrologic data. A review of Water Right No. 29-07699 shows the following condition of approval:

A measuring device and lockable controlling works of a type acceptable to the department shall be permanently installed and maintained as part of the diverting works. Also, a measuring device with a continuous strip chart recorder (or other recording device) as approved by the department shall be installed and maintained on the natural channel to measure the flow in the bypassed reach. Records of bypass flows shall be sent to the department upon specific request of the department but not more frequent than 30 days after collection.

Per the above condition, IDWR is requesting historical flow records on both the diverting works and the natural channel, dating as far back as can reasonably be provided. Please submit available records within 30 days electronically to amy.steimke@idwr.idaho.gov, or please contact me via email or over the phone at (208) 287-4833 to discuss other submittal options.

Moving forward, IDWR anticipates making similar requests for future data collection.

Sincerely,

A handwritten signature in black ink, appearing to read "Amy Steimke", with a stylized flourish at the end.

Amy Steimke, P.G.
Project Manager
