SEVEN HIGH RANCH Protest comments June 20, 2025

The proposed Transfer, 89752, moves the POD on Reynolds Creek from the current sites in 1S 3W sec 15 nwse and 1S 3W sec11 nwne to the Snake River 1S 2W sec 6 nwswe lot 9 and sec 17 senenw lot 5. The distance from the 57-277 POD to the Snake River is approximately 2 miles to the confluence of Reynolds Creek and the Snake River. Then up the Snake River to proposed POD is approximately 1 mile. The distances proposed in this move are extreme and creates unknowns. My protest is how does IDWR propose to administer this Transfer without financially burdening the existing water right owners? There are no in-stream weirs in that area for measurements to move water from the POD to the Snake River. A solution might be to create a weir site that does not interfere during flood or high flows near the confluence of Reynolds Creek and the Snake River and would adequately measure the rights in the Transfer during low flows. Though that burden should be on the Transferee.
