APPLICATION FOR TRANSFER OF WATER RIGHT

GENERAL INFORMATION AND INSTRUCTIONS

Pursuant to Section 42-222(1), *Idaho Code*, a transfer application may be filed to change the point of diversion, place of use, period of use, or nature of use of all or part of an established water right. Any person proposing to make such a change is required to file a transfer application with the Department. "Such application shall be upon forms furnished by the department and shall describe the [water right] to be changed and the changes which are proposed and shall be accompanied by the statutory filing fee." *Idaho Code* § 42-222(1).

The Department has developed this application form to assist applicants in satisfying the requirements of Section 42-222(1). This application form requests information about the applicant's authority to file (Part 1), information about the current elements of the water right(s) to be changed (Part 2), information about the proposed changes (Part 3), information about the validity of the water right(s) and the effects of the proposed changes (Part 4), and confirmation that the information provided is truthful (Part 5).

The applicant or their representative must provide a response for all applicable questions, any additional information required, and the proper filing fee before this application will be considered complete. If an application is incomplete or more information is required, the Department will notify the applicant or representative and allow time for the application to be completed. An application that remains incomplete will be returned to the applicant and the filing fee will be refunded.

An application for transfer is limited to the changes proposed for a single water distribution system. A proposal to change two or more separate water distribution systems, that will remain separate after the transfer, must be filed as separate applications. Applicants may provide additional pages to supplement their responses to the questions posed on this application form. Supplemental forms for listing additional water rights, points of diversion, or places of use can be found on the Department's website (idwr.idaho.gov). If you need assistance understanding the questions on this form, generating current water right reports, determining legal descriptions, or accessing water measurement records feel free to contact the nearest regional office of the Department.

B. Current Owner. If the applicant is not the current owner of record for all water rights included in this application, attach documents showing that the applicant has the authority to make the proposed changes. Label documents as Attachment 1B.

C. Updating Ownership Records. Applicants needing to update the ownership records for any of the water rights included in this application must attach documents supporting the ownership change. Such documents must trace ownership of the subject water rights or the current place of use for the subject water rights from the current owner of record for the water rights to the applicant. Label documents as Attachment 1C.

D. Business Entities. If the applicant is a business entity (corporation, LLC, partnership, trust, etc.), is the entity currently registered with the Idaho Secretary of State?

☐ Yes. If this application is signed by someone other than a person listed on the most recent annual report filed with the Idaho Secretary of State, attach documents confirming the authority of the signer to sign on behalf of the business entity. Label documents as Attachment 1D.

☒ No. Attach documents confirming the authority of the signer to sign on behalf of the business entity. Label documents as Attachment 1D.

E. Approval of Irrigation Delivery Entity. Section 42-108, *Idaho Code*, states that a transfer application proposing to change water rights held by an irrigation company or district requires the consent of the irrigation entity. If this application proposes to change water rights held by an irrigation entity, attach a letter of consent from the entity (labeled as Attachment 1E) or have an authorized representative of the entity co-sign the application.

F. Encumbered Properties. If the current place of use for the water rights included in this application is subject to a lien, deed of trust, mortgage, or contract and the application proposes to change the nature of use of the water rights or to move water rights off the current place of use, attach a statement of consent for the change signed by the lien holder, trustee, mortgagor or contract holder. Label documents as Attachment 1F.

G. Legal Access. Label documents as Attachment 1G. For example, an applicant may provide a letter of consent from the owner of the land or conveyance system or may have the owner co-sign the application. For applications proposing to divert water on or convey water across federal land, an applicant is not required to demonstrate legal access to the federal land prior to approval. Instead, if the transfer application is approved, the applicant must obtain access authorization from the relevant federal agency prior to diverting water under the subject water rights.

PART 2 – WATER RIGHTS BEFORE PROPOSED CHANGES

A. Current Water Rights. For each water right proposed to be changed, attach a current water right report obtained from any Department office or from the Department's website (idwr.idaho.gov). Label water right reports as Attachment 2A.

B. Map of Current System. Attach a map of the current point(s) of diversion and place(s) of use for the water rights to be changed. The map should clearly depict the elements of the water rights to be changed. For example, if the application proposes to change the point of diversion for a water right, the map should display the current location of the point of diversion. For irrigation water rights, the map should also identify the location of the irrigated acres to be changed. Label map as Attachment 2B.

C. Current Location of Irrigated Acres. If this application proposes to change the place of use or nature of use for only a portion of an irrigation water right, use the following table to identify the current location of the irrigated acres to be changed. If additional pages are required, label additional pages as Attachment 2C. If this application proposes to change or rearrange the entire place of use for irrigation water right(s), skip to Part 3.

☐ **N/A.** This application does not propose to change the place of use or nature or use of an irrigation water right or this application proposes to change the place of use or nature of use for an entire irrigation right.

PART 3 – DESCRIPTION OF PROPOSED CHANGES

A. Purpose of Transfer. Section 42-222(1), *Idaho Code*, states that transfer applications may only be filed to change the point of diversion, place of use, period of use, or nature of use of an established water right. Section 42-248(3), *Idaho Code*, authorizes water right ownership changes to be described on a transfer application. Identify the changes proposed in this application:

- | | |
|--|--|
| ☒ Change point(s) of diversion | ☒ Change place of use |
| ☐ Add point(s) of diversion | ☐ Change period of use |
| ☒ Change nature of use | ☒ Update water right ownership records |

B. Proposed Changes. Describe the proposed changes in narrative form:

This transfer will include water right 45-13905 into the existing PPU. The PPU will be updated to reflect water management changes. The water right 45-13905 was leased into the Water Supply Bank from 2010 through 2020. 45-13905 is now utilized for mitigation purposes with Southwest Irrigation District. This transfer will change the beneficial use of 45-13905 from stock and commercial water back to irrigation. Transfer #71925 was never implemented.

C. Summary of Proposed Changes.

1. Water Rights. Use the following table to list all water rights, or portions thereof, that are proposed to be changed as they would appear after the proposed changes. In the Amount column, list the volume in acre-feet (af) for storage uses or the rate in cubic feet per second (cfs) for all other uses.

☐	☐			to	

2. Total Amounts. Calculate the total quantity, in cfs or af, of water rights that are proposed to be changed through this application. For an application proposing to only change the place of use for irrigation rights, the total quantity of water is calculated by comparing the current place of use to the proposed place of use, summing the number of acres increased in each legal subdivision, and quantifying the proportional amount of diversion rate for the increased acres. For an application proposing to change or add points of diversion for irrigation or any other beneficial use, the total amount is the total diversion rate for the changed portion of the right.

Total Amount of Water Rights Proposed to be Changed: 53.31 cfs and/or 14,044 af.

3. Point(s) of Diversion. Use the following table to list all the proposed points of diversion for the water rights to be changed, including any current points of diversion that will continue to be used as part of the proposed water distribution system.

The legal description for the proposed point(s) of diversion must be to the nearest 40-acre subdivision (QQ) or U.S. Government Lot of the Public Land Survey System (PLSS). PLSS information is typically available from USGS topo maps, property deeds, tax bills or various mapping tools on the Department's website.

For points of diversion within platted subdivisions, list the lot and block number in the "Diversion Name/Number" column. An application proposing an injection into a stream and a re-diversion from that stream must list the source for the original diversion as the source for the injection and re-diversion points. If this application proposes construction of a new diversion structure (for example, a new ground water well or a new pump station on a creek), please indicate the status in the appropriate column.

PART 4 – ADDITIONAL INFORMATION

Section 42-222(1), *Idaho Code*, establishes the criteria used to evaluate transfer applications. An applicant bears the burden of demonstrating that the water right to be changed is a valid right, that the proposed use is a beneficial use, and that the proposed changes will not injure other water rights, will not enlarge the use of the original rights, are in the local public interest, and are consistent with the conservation of water resources within the state of Idaho. To satisfy this burden, an applicant must provide sufficient data and information for the

The Department may deny an application if the applicant fails to provide sufficient data and information to determine whether the criteria from Section 42-222(1) are satisfied. In addition to the information requested in Parts 1-3 of this application, the following information must be provided for an application to be considered complete. Department staff may request additional information or clarification as the application is processed.

A. Validity of Water Rights

1. If one or more of the water rights proposed to be changed is a statutory claim, established pursuant to Section 42-248, *Idaho Code*, attach evidence supporting the priority date claimed. Label documents as Attachment 4A-1. For statutory claims, the Department may conduct a field inspection as part of the application review process to evaluate the water right elements listed on the statutory claim.

2. Has any portion of the water right(s) proposed to be changed undergone a period of five or more consecutive years of non-use?

☐ Yes. Attach a statement describing the portion of the right(s) that were not used and the length of time of the non-use. In addition, identify any exception or defense to forfeiture and provide a detailed description as to why the water rights have not been lost and forfeited for non-use. Label documents as Attachment 4A-2. Statutory exceptions or defenses to forfeiture are set forth in Section 42-223, *Idaho Code*.

☒ No.

B. Injury to Other Water Rights

1. Identify any other water right(s) diverted at the current point(s) of diversion.

None

2. Identify any other water right(s) diverted at the proposed point(s) of diversion.

4. If already constructed and in use, are the proposed points of diversion equipped with Department-approved measuring devices? ☒ Yes. ☐ No.

5. If this application proposes to divert a surface water right from a ground water well, attach a technical analysis evaluating the hydraulic connection between the proposed ground water point of diversion and the source of water listed on the right to be changed. Label technical analysis as Attachment 4B-5.

6. If this application proposes changing the point of diversion for a ground water right in the Eastern Snake Plain Aquifer (ESPA), attach a technical analysis of the anticipated depletions to reaches of the Snake River that are hydraulically connected to the ESPA using the Department's current ground water model for the ESPA. The technical analysis must evaluate depletion impacts in a time-series format at transient and steady state time steps. To assist applicants in preparing the required technical analysis, the Department has developed a transfer tool interface for the ESPA model. The transfer tool and user instructions can be downloaded from the Department's website (idwr.idaho.gov). If the proposed and current points of diversion are in the same or adjacent model cells, no technical analysis is required, unless specifically requested by the Department. Label technical analysis as Attachment 4B-6.

RECITALS

The numbers of the water rights referred to in this Agreement are those numbers assigned by the Idaho Department of Water Resources. The water rights subject to this Agreement are described on Exhibit A attached.

For the purposes of this Agreement, all of the above described water rights shall be referred to as "water rights".

In addition, stock water rights owned by the United States are also described in this Agreement on Exhibit B attached. Those shall be referred to as "United States stock water rights".

The real property that is subject to this Agreement is that real property described on Exhibit A set forth in those Deeds described in the column entitled "Cassia Deed Instru. No." and owned by those persons and entities described in the column entitled "Change Owner To" on Exhibit A.

For the purposes of this Agreement, all of the foregoing real property shall be referred to as

1
2
3 “real property”.

4 The Idaho Department of Water Resources records state that the owner of the water rights to be
5 those persons or entities described in the column entitled “IDWR Owner” on Exhibit A. The names of
6 the owners need to be changed as described in the column entitled “Change Owner To” on Exhibit A.

7 The owners of the water rights and real property operate a common irrigation system. The
8 owners of the real property and water rights desire to amend the places of use of the water rights so that
9 all of the water rights can be used on all of the real property described in the Deeds described on Exhibit
10 A.

11 The parties desire to set forth their agreement in writing.

12 Based upon the foregoing which constitutes substantial and material consideration for this
13 Agreement and for other consideration received but not recited, the parties agree:

14 1. **OWNERSHIP OF REAL PROPERTY**: Nothing in this Agreement affects the ownership
15 of the real property and the ownership of the real property shall remain as described above.

16 2. **OWNERSHIP OF WATER RIGHTS**: The ownership of the water rights is reflected in
17 the column entitled “Change Owner To” on Exhibit A, and the parties agree to cooperate with one
18 another and file all documents required by the Idaho Department of Water Resources, including Notices
19 of Change in Water Right Ownership Form No. 42-248/42-1409(6) in order to accurately reflect the
20 name of each owner of each water right on the records of the Idaho Department of Water Resources.
21 Nothing in this Agreement affects the ownership of each of the water rights as described on Exhibit A
22 and ownership of each water right shall remain as described on Exhibit A unless ownership is
23 transferred by the owner.

24 3. **PLACE OF USE**: All parties agree that the place of use of the water rights shall be all of
25 the real property described on those Deeds recorded in Cassia County and described in the column
26 entitled “Cassia Deed Instru. No.” on Exhibit A.

27 4. **APPLICATION TO DEPARTMENT OF WATER RESOURCES**: The parties shall
28 cooperate with one another in filing a Transfer Application with the Idaho Department of Water

Resources in order to transfer the place of use of the water rights as described in this Agreement.

5. **MANAGEMENT OF IRRIGATION SYSTEMS; EASEMENTS**: Each party, or parties in the case of a joint system, shall be responsible for the operation, maintenance, repair, and replacement, at that party's cost, of the irrigation equipment and irrigation water delivery system delivering irrigation water to that party's property. Each pipeline is described on Exhibit C attached and the owners of each water delivery system are described in the column labeled "Owner(s) and Description of Pipelines". Each party owning property through which a pipeline runs, as described on Exhibit C in the column labeled "Easement Property (Servient Estate)" that benefits another party grants to the benefitting party an easement for the purpose of delivering irrigation water as is reasonably necessary to install, maintain, repair and replace the irrigation system and an easement for ingress to and egress from the Easement Property as is reasonably necessary to install, maintain, repair and replace the irrigation system. The easements described herein run with the real property. Should a party request a specific written easement describing an easement, the parties to the easement agree to cooperate with one another and obtain a metes and bounds description of the easement that will be memorialized in an easement agreement, signed and recorded separately from this agreement. Notwithstanding the foregoing, the owner(s) of a pipeline and the owner(s) of easement property may enter into separate written agreements pertaining to the irrigation system and easement involving those parties.

The easements and rights described herein apply to the irrigation systems as they exist on November 1, 2025. In addition to the foregoing, the pipeline that Cloyd and Clifford own jointly can be expanded by adding an additional line within 5 feet of the existing line. Permission for this expansion will end by and work must be completed by December 31, 2035. Any other additions or expansions must be agreed upon and approved by the record owner of the real property upon which the pipeline or expansion is proposed. An easement can only be transferred to the subsequent record owner of the real property benefitting from the easement.

All easements described herein can be used solely for the purposes described in this agreement.

Disturbance of the soil or damage to crops resulting from the maintenance, repair or

1
2
3 replacement of an irrigation system and/or by damage resulting from water released in a system failure
4 requires that the real property must be restored to its prior condition; damage to a crop will be
5 reimbursed at a rate of gross revenue per acre for the crop year of the crop damage. If a pipeline owner
6 or renter damages a landowner's other existing pipelines, wires or other systems components at any
7 time including during maintenance, repair, replacement, additions and expansion, the pipeline owner or
8 renter who damaged the other system is liable for the cost of repairs and damages.

10 B are owned by the United States and have a stock water purpose of use. The parties agree that the
11 United States stock water rights can be used by any party to this Agreement that is the owner of the
12 active grazing permit associated with the United States stock water right.

13 7. **PERPETUAL AGREEMENT**: This Agreement shall commence the date of signing by all
14 parties and shall be perpetual in time unless terminated as provided herein.

15 8. **TERMINATION OF AGREEMENT**: Any owner of a water right and/or real property
16 may terminate that owner's participation in this Agreement by notifying all other parties, in writing, of
17 said termination. Termination may not take place between March 1st and November 30th of any year. In
18 the event of termination, the terminating owner must:

22 the owner's water rights. All costs of application shall be paid by the terminating owner.

23 8.3. Termination shall not be effective until the Idaho Department of Water Resources
24 approves the proposed change in place of use.

25 Termination of this Agreement by one owner shall not effect this Agreement as to the remaining
26 owners.

27 9. **HEIRS AND SUCCESSORS BOUND**: This Agreement shall be binding upon the
28 successors, heirs, personal representatives, and assigns of the parties hereto.

Mr. Greg Sullivan:

This letter is to confirm that the Moo View Cow Palace water rights owned by Craig Searle have been participating in Southwest Irrigation District mitigation and management plans since inception. This includes irrigation and non-irrigation water rights alike. Each right has been accounted for and allocated water. Users are encouraged to conserve water and non-use of water rights is tracked and reported as part of the plan activities. SWID discourages members from leasing water to the water supply bank so that it can be accounted for in the mitigation and management plan.

We understand a water right transfer is being applied for and we will adjust our accounting as necessary to accommodate the transfer.

Yours very truly,

Randy Brown

Re: Fee Evaluation

Filing fees charged for transfer application #90380 are based on the percentage of each individual water right in the transfer application that could be moved to the additional acres proposed to be added to the permissible place of use. The analysis of the nineteen water rights indicated that a total of 35.55 cfs could be moved to new ground, resulting in a fee of \$2660.00. An additional \$250.00 fee for processing a change of nature of use was included along with a \$475.00 fee for processing ownership changes for all of the nineteen rights in the transfer, making the total fee for this transfer application \$3385.00 (Receipts S040983 & S040999).

Greg,
I know this doesn't jump right out at you because there are so many wells, but there are a total of 18 wells listed on the Searle irrigation ground water rights. Your exhibit C has 19 wells. Line #4 and Line #19 both list well #3 in the NWSWNW 11S 23E S32. Are we adding a second well in that location to all the water rights or is it possibly a typo?
Thanks,
Bill

Bill,

I am not sure I am following you on this. The current water rights identify a well in the NWSWNW of Section 32 and another well in the SWSWNW of Section 32. Exhibit C matches IDWRs records for well/POD locations.

Greg,

Exhibit C – POD Descriptions in Transfer # 90380 (Searle Family) lists two wells located in the NWSWNW of Sec. 32, Twp 11S, Rge 23E. However, the local name or tag # refers to both as number 3. Please confirm, are there two wells at that location or is there just one?

Thanks,

Re: Searle Water Right Transfer

Dear Mr. Skinner:

It is the desire of Raymond Searle, Cloyd Searle, Kent Searle, Craig Searle, Clifford Searle and Kelly Searle to update a large permissible place of use with the water rights they own. This transfer will change the beneficial use of water right 45-13905 from stock and commercial water to 88.0 acres of irrigation. The ownership of the water rights will be updated as described in Exhibit B. The Burley Irrigation District and the Searle's have a transport agreement that allows the Searle's to utilize Burley Irrigation District's canal as transports for ground water. Southwest Irrigation District utilizes water rights involved in the transfer for soft conversion and volume reductions to satisfy the IGWA and SWC approved mitigation plan.

Water right 45-13905 was involved with transfer #71925 that was approved in 2006. Transfer #71925 converted 88.0 acres of irrigation water to the beneficial use of stock and commercial water for a future dairy that was to be built. The dairy has never been built. Aerial photographs of the area will confirm that the dairy facility was not constructed.

From 2010 through 2020, water right 45-13905 was leased into the Idaho Water Supply Bank. The entire portion of 45-13905 was rented back to the Searle's for the beneficial use of irrigation on 88.0 acres. This transfer proposes to allow 45-13905 to provide sufficient irrigation water for 88.0 acres as it did before transfer #71925 was approved and as 45-13905 has done by rented water from the Idaho Water Supply Bank.

The water rights that will be included in the permissible place of use are 45-13905, 45-690, 45-691, 45-2383, 45-7004, 45-7118, 45-7125, 45-7186A, 45-7317, 45-13904, 45-13981, 45-13982, 45-14412, 45-14413, 45-14414, 45-14415, 45-14416, 45-14417 and 45-14418. The authorized points of diversion for the water rights in this transfer will not be updated with this transfer because all of the points of diversion currently list all of the irrigation water

rights. No additional wells are proposed to be drilled after this transfer is approved.

Aerial maps included with the application identifies the proposed PPU, irrigation POU and the proposed POD locations for the PPU.

Warranty deeds for property covered by the PPU are provided with the transfer application.

The fees for this transfer will include \$475.00 for the ownership changes, \$250.00 for the change of beneficial use of 45-13905 and \$500 for the 0.3 cfs of 45-13905 to be included in the large PPU.
