Hi Bob,

Yes per our conversation this morning - I do not feel it necessary to include the data logger requirement. I am comfortable moving forward using the R43 condition without the data logger verbage.

Thank you!

Hi Lacey,

Thank you for taking the time to discuss the Wild and Scenic conditions with me this morning.

As we discussed, condition 215 states:

“Prior to the diversion and use of water under this right, the right holder shall install and maintain acceptable measuring device(s), **including data logger(s)**, at the authorized point(s) of diversion and in accordance with Department specifications, or shall obtain an approved variance from the Department to employ an alternative method to determine and record the amount of water diverted.”

Do you feel it necessary to include the data logger requirement within your water district for proper administration? If not, would you find it acceptable to use a condition such as R43 at licensing which states:

“The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).”

Thank you for your time and consideration of this matter. Feel free to reach out with any questions or concerns.
