I assume you meant 63-34374. If so, it seems to have been incorporated in the main report for all of their other permits.

Nick and Kate,

Please find attached the 2024 Monitoring Report for certain CS Property Development LLC water rights in southern Ada County. The filing of this annual report was required during the 10-year monitoring period established for permits 63-32680 and 63-33296, and it is also an approval condition for permits 63-34373 and 63-34374. Several additional permits authorize diversions and uses of water from points of division and at the places of use associated with the rights 32680, 33296, 34373 and 34374, and information pertaining to those additional permits is also provided in the report.

The 10-year monitoring period for permits 63-32680 and 63-33296 appears to have concluded in 2024, however filing of annual reports is still required for permits 63-34373 and 63-34374. Moving forward, please let me know if IDWR would like to request changes to the report structure for future reports for permits 63-34373 and 34374.

Thank you
