Comments: Three federal stockwater rights (WR) 78-10400, 78-10399, and 78-10405 overlap the permitted place of use (POU). However, since the existing WR is for a different use and authorizes a different use and do not overlap the permitted point of diversion (POD) there is no reason to limit this permit with existing WR's

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \underline{N/A}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = \underline{N/A}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = \underline{N/A}$$

2. Volume Calculations for Other Uses: The permit authorizes fire protection. According to the IDAPA Beneficial Use Examination Rules 37.03.02.035.01h.iii.iv if a permit authorizes fire protection a recorded diversion volume is not required at licensing.

H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office licensing examination. The permit authorized fire protection diverting from Goose Creek. After reviewing 2025 Aerial Imagery and the permit holders proof statement development of a fire protection system was confirmed within the development period. A condition on the permit requires the permit holder to install a fish screen meeting the fish screening and passage requirements of the Idaho Department of Fish and Game. The permit holder confirmed on their Proof Statement that a fish screen was installed on the diversion intake. Since the permit authorized fire protection, a recorded diversion volume is not required at licensing according to the IDAPA Beneficial Use Examination Rules 37.03.02.035.01h.iii.iv. All conditions of permit approval have been met, and development of beneficial use was confirmed within authorization on the permit. Therefore, I am recommending a 0.02 cfs diversion rate.

Conditions R05 and 077 should remain on the license. Condition 121 should be changed to 103 as is standard with licensing.

Have conditions of permit approval been met? ☒ Yes ☐ No
