RE: Ownership Change Resulting in Split of CFPRBA Claim No. 96-9269

On April 20, 2026, the Northern Regional Office received a Notice of Change in Water Right Ownership for CFPRBA claim no. 96-9269 from Terry E. and Kathleen S. Oliver. The ownership change involved only a portion of the claimed place of use (POU), which necessitated a split. Water right license 96-9269, and the subsequent claim filed on it, include the irrigation of 60 acres within a permissible place of use (PPU) of 186.2 acres. Accordingly, resulting claims were proportionately split as follows:

96-9269 – Brackebusch – Claim before split

- Total Acres (PPU) = 186.2
 - Irrigation limit within PPU = 60 AC
 - Diversion Rate = 1.2 CFS
 - Annual Diversion Volume = 180 AFY
-

96-9269A – Brackebusch – Portion of claimed POU remaining after split

- Total Acres (PPU) = 129.0
- $129.0 / 186.2 = 69.3\%$ of licensed PPU
- 69.3% of 60 = 41.6 AC
- $41.6 \times 0.02 = 0.83$ CFS (0.02 CFS per acre as licensed/claimed)
- $41.6 \times 3 = 124.8$ AFY (3.0 AFY per acre as licensed/claimed)

96-9269B – Oliver – Portion of claimed POU resulting from split

- Total Acres (PPU) = 57.2
- $57.2 / 186.2 = 30.7\%$ of licensed PPU
- 30.7% of 60 = 18.4 AC
- $18.4 \times 0.02 = 0.37$ CFS (0.02 CFS per acre as licensed/claimed)
- $18.4 \times 3 = 55.2$ AFY (3.0 AFY per acre as licensed/claimed)
