RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. Rights 37-11329, 37-466 and 37-579 when combined shall not exceed a total diversion rate of 0.10 cfs and the irrigation of 5.0 acres.

WATER SUPPLY BANK RENTAL AGREEMENT No. 987

10. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
11. Water shall not be diverted under this right when flows in Big Wood River are below minimum flow amounts as defined by Right 37-466. The right holder shall be responsible for monitoring the daily flow of the Big Wood River using real-time data and shall cease diverting water when flows in the Big Wood River are below established minimum flow amounts. Unless otherwise specified by the Director of the Department of Water Resources, data from the U.S. Geological Survey Big Wood River at Hailey gauging station, 13139510.
12. The right holder shall make full beneficial use of all surface water available to the right holder for irrigation of lands within the authorized place of use for this right. The right holder may divert ground water under this right to irrigate land with appurtenant surface water rights when the surface water supply is not reasonably sufficient to irrigate the place of use for this water right or is not available due to drought, curtailment by priority, or the seasonal startup and shutoff or maintenance schedule for canal company or irrigation district deliveries. The right holder shall not divert ground water for irrigation purposes under this right if use of the surface water supply is intentionally discontinued or reduced (for example abandoned, forfeited, sold, disallowed by court decree, or leased to the Water Supply Bank), or is not deliverable due to non-payment of annual assessments, without an approved transfer pursuant to Idaho Code § 42-222 or other Department approval.
13. Diversion of water right 37-466 is limited to those times water is available for diversion under this right and priority from Deer Creek.
14. Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. MEMORANDUM FOR AGREEMENT 987

To: Water Right(s) 37-11329 & 37-466
From: Catalina Beck Water Resource Agent
Date: February 17, 2026
Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The rental application was received on August 11, 2025 and proposes to rent 0.10 cfs and 17.5 af from groundwater to irrigate 5 acres. This rental application is a renewal from previous agreement 695. The applicant Kathleen Rosekrans is requesting to rent water from the water supply bank for 5 years, however, the water right available for rent from the same basin has only one year of availability starting in 2026. When surface water is not available within the existing irrigation system, the rented water will be used to supplement existing surface water right 37-579 at the authorized place of use. Water right 37-11329 currently authorizes the irrigation of 192 acres and leased into the water supply bank along water right 37-486. 5 acres will be rented from contract 1984.

The proposed rental point of diversion is located within the Big Wood River Groundwater Management Area and the Trust Water Area.

AUTHORITY TO FILE: Kathleen Debretteville Rosekrans signed the rental application. The land to be irrigated and the point of diversion used for the rental is an existing well from water right 37-579, 37-892, 37-891A and is owned by Kathleen De Bretteville Rosekrans Family Trust. Md. Rosekrans is a trustee of the There are no concerns with authority to file.

INJURY TO OTHER WATER RIGHTS: The rental point of diversion and the lease point of diversion are located approximately seven miles apart. Both the rental applicant and the lessor divert groundwater from the same hydrologic basin and the same aquifer zone, commonly referred to as the Hailey Zone. The addition of water from water right 37-11329 to the proposed rental place of use will result in an equivalent impact to the main aquifer. Because the source, season of use, and aquifer zone are consistent, the overall hydrologic effect is offset within the basin. Therefore, no injury to other water rights is likely as a result of moving the groundwater lease diversion under this rental.

ENLARGEMENT OF USE: The rental water will be used only as supplemental to the existing surface water rights 37-579, and to prevent enlargement, a condition will be added to the agreement requiring full beneficial use of all surface water available and divert ground water appurtenant with the surface water when the surface water is not sufficient to irrigate the place of use.

Since water right 37-11329 is a supplemental water right to surface water right 37-466, water right 37-466 must be included in the rental. Since water rights 37-11329 and 37-466 will be stacked at the proposed place of use, the leased water rights will have a combined limit of 5 acres to avoid enlargement.

Water rights 37-11329 and 37-466 = 0.0865 cfs, 17.5 af for 5 acres. ($0.0173 \text{ cfs/acre} \times 5.0 \text{ acres} = 0.0865 \text{ cfs}$ which rounds to 0.09 cfs), ($3.5 \text{ af/a} \times 5.0 \text{ acres} = 17.5$).

LOCAL PUBLIC INTEREST: The proposed rental of water is in the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The proposed rental is consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The proposed POD is within the administrative area of IDWR's Southern Region and Water District No. 37. Comments regarding the proposed rental were requested from the regional manager and Watermaster on March 12, 2026. No comments were received.
