Conditions of Approval:

1. 220 The reservoir established by the storage of water under water right 36-17370 and Rights 36-16982, 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 shall not exceed a total capacity of 143.0 acre-feet or a total surface area of 18.9 acres.
2. 219 Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 authorize the diversion of an annual total of 187.6 acre-feet to be used for recreation and aesthetic storage for the initial (annual) filling of the reservoir and for the replacement of losses caused by evaporation from the reservoir authorized under right 36-16982. The 945 acre-feet of recreation and aesthetic storage use described by right 36-16982 accounts for the annual seepage losses associated with the reservoir. In combination, right 36-16982 and Rights 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total recreation and aesthetic storage volume of 1,132.6 acre-feet (enough to fill the reservoir once, and to keep the reservoir full by making up annual losses associated with seepage and evaporation). The 1,292.0 acre-feet of irrigation storage described by water right 36-17370 accounts for the volume of water that may be diverted into the reservoir and rediverted for irrigation use throughout the season as reservoir levels fluctuate. In combination, water right 36-17370 and Rights 36-16982, 36-16956, 36-16957, 36-16958, 36-16959, 36-16960, and 36-16961 allow for a combined annual total storage volume of 2,424.6 acre-feet for all uses.
3. G22 The source of this water right includes waste water. The right remains subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place or manner of wasting it, or to recapture it.
4. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.
5. R43 The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
6. R40 The storage of water under this right is contingent upon continued certification by the Department of Water Resources under the dam safety provisions of the Idaho Code, authorizing storage.
7. T07 The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
8. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
9. T19 Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
